

SOLAR SHOWERS

formidra

Catalog 2018

Innovative solar showers conceptor and manufacturer.

Innovation and know-how are the key words that have raised **Formidra** to the rank of **reference brand** in the solar shower market.

Both the experience and the Research & Development efforts have allowed us to create **exclusive ranges** of solar showers, combining **quality, aesthetics and ecology.**

Our **unique manufacturing process** is modernizing the field of solar showers by using the shower itself as a reservoir.

This reservoir is **fully heated by solar heat** to provide hot showers, available in various capacities, **between 23 and 44L.**

Our solar showers combine :

- **Ecology** with natural heating - **100% solar.**
- **Simplicity**, due to the easy installation with a standard connection.
- **Unique** design with elegant and colourful curves.

Our **greatest pride** is to have succeeded in transforming a useful product into a **decorative** item that will idealize your exterior.

Ecological system

formidra

Formidra solar showers use solar energy to heat the water tank contained in their structure. A simple cold water connection is enough, solar power will provide you with hot water, from the beginning of fine days.

Having a shower before entering your swimming pool preserves the hygiene of your pool's water. This habit will help you limit your pool's water treatment without investing in expensive installations.

Mounting kit

Water inlet

Bleed screw and pressure relief valve

Installation instruction

Formidra solar showers are meant for outdoor use. We recommend to install your solar shower where the sun is the most exposed, and, if possible, nearby water supply and drainage.

Using Advice

On the first use, connect your solar shower to a standard garden hose and open the mixer to fill up the shower tank.

Maintenance instruction

At the end of the season, to avoid any water freezing, turn off the water supply and empty the shower with the bleed screw located at its base.
