Solar Technology

- Preserve your pool hygiene
- Limit chemical treatment usage
- Easy to install and affordable

An ecological system

Formidra solar showers use solar energy to heat the water contained in their whole structure. A simple cold water connection is enough, solar power will provide you with hot water from the first rays of sun.

Easy connection

Drainage plug with security valve

Pressure reducer for domestic water systems higher than 3 bars

Hybrid

Technology

INNOVATION

*"Enjoying a warm shower,
day and night"*

A new technology

The DADA range features both FORMIDRA solar technology and a connection to hot water.

Choose depending on the season:

100% solar water
or water drawn from the **domestic supply**.
