MAKE ACCESSIBLE

TO ALL

Poolstar was born in 2006 from the idea of designing products in the world of swimming pools, gardens and wellness, with sense yet with a dash of insolence. Our desire is to play with innovation and act boldly in order to surf new markets with ingenuity and accessibility. A strategy that has allowed us to grow constantly and position ourselves today as a must-have brand throughout the market.

INNOVATE

WITH SENSE

Accessibility for the user is Poolstar's driving force! A Poolstar product is a product that is easy to use and available at an affordable price. Because we design our products and control the entire chain from design to delivery, we can guarantee a fair price on all our products! A bet that works!

CREATE WITH AUDACITY

At Poolstar, we listen, we watch and we create from existing needs, which anyone has yet to meet on a large scale. We are constantly looking to get ahead of expectations and create the need by rethinking the design, adding technology: innovation as a source of inspiration.

★★★ OUR 3 UNIVERSES

A GROUP WITH INTERNATIONAL FOCUS...

OUR MISSION: MAKE OUR PRODUCTS ACCESSIBLE TO ALL, IN THE ENTIRE WORLD.

Present in 50 countries, in Europe and around the world, we shake up existing codes and offer innovative, high-performance products that constantly offer better value for money.

In 2021, more than 3,500 customers around the world have been able to trust us and recommend Poolstar.

Our logistics platform handled 190,000 shipments (+ 45%) to our client base, formed of both pool craftsmen and players in the large-scale distribution sector.

... AND FUTURE DRIVEN

To consolidate our progress in the various markets, we need to equip ourselves with the necessary tools.

First of all, a solid human project with the recruitment of no less than 35 employees to strengthen our business processes and make them more seamless and efficient, at the service of customer satisfaction.

Also, facility expansion that started in 2021, and the addition of 7,000 m^2 of warehouses and 1,000 m^2 of offices to be even more responsive.

DESIGN CENTRE, HEART OF POOLSTAR INNOVATION

Strategically located between the Mediterranean & Provence, our Rousset head office have been designed to be the company's technical and integral centre.

It is here that our 100 employees design, evaluate and test with passion tomorrow's products. As Poolstar's Values Ambassadors, their common mission is client satisfaction.

TESTING & TRAINING CENTRE

Our indoor and outdoor showrooms are equipped with two heated pools. These enable us to present our products on site and train various teams. It is also here that our technical teams test prototypes and products live in order to constantly improve them.

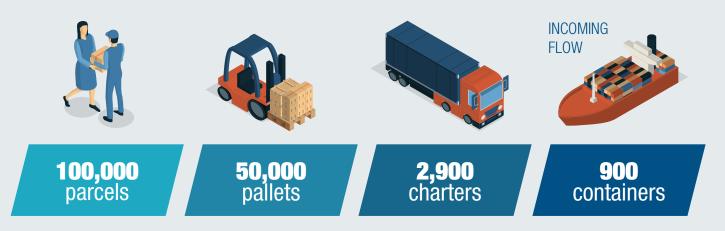

Pool

NET

20,000 M² WAREHOUSING

TRANSFORMING EVERY ORDER INTO A SHIPMENT

With our international logistics department, we are on deck 24/7. Poolstar's warehouse comprises 23 loading docks with increased management capacity! Automatic order processing and new generation management tools afford us optimum efficiency.

EXCLUSIVE & INNOVATIVE SERVICES FOR ALL PROFESSIONALS

PROFESSIONAL THERMAL BALANCE

A simple and complete tool enabling pool professionals to guarantee heat pump sizing according to the swimming pool.

POS COMMUNICATION SUPPORTS

To make it easier to showcase and explain our products, we design them with informative and technical communication kits that can be downloaded directly from our website.

HOTLINE & INTERNATIONAL AFTER-SALES-SERVICE TEAM

Our After-Sales-Service technicians process requests in French and in English. Hotline: +33 4 91 51 15 17

YEAR-ROUND TRAINING

Team training is an asset and a guarantee of quality for our customers. Our showroom is a space of technical excellence where one can discover our products.

DEDICATED TEAM FOR OUR PROFESSIONAL CLIENTS

14 sales people on the field and 9 support staff work tirelessly to satisfy our professional customers and advise them on the marketing of our products.

To customize aquabikes' functionalities.

TECHNICAL TRAINING

We train our in-house teams as well as those on the field.

WHITE LABEL PRODUCTS

We adapt our products to your markets, your brands and customize them according to your needs.

SUPPORTS TO HELP THE USER

SIMPLE PRODUCTS THAT ARE EASY TO USE

Our products are thought and conceived to simplify their use. Their design and technologies make them accessible to all.

A SIMPLIFIED HEAT PUMP CALCULATOR FOR THE USER

To facilitate their choice, the user can quickly determine which heat pump will be best suited for their pool from 5 to 250 m3 regardless of the geographical region.

ADVICE

Accessible directly on our websites and social media.

Because a picture is worth a thousand words, tutorials that help the user understand how a product works, how to install it and how to start it.

AFTER-SALES TEAM

WE ARE THERE BEFORE, DURING & AFTER THE SALE!

At Poolstar, satisfaction is seen in the overall customer experience. This is why in 2021, we have strengthened our After-Sales Service.

A NEW TEAM ORGANIZATION

In support of the Sales Administration and Sales team, we have reviewed Poolstar's After-Sales Service internal organization. We have implemented a new structure and new processes. 7 trained technicians intervene every day in problem solving and remote intervention to repair bugs and guide our customers to use their products properly.

STRUCTURING OUR RESPONSE PROCESS: RESPOND BETTER

To go faster and respond better, we have analysed and prioritized requests. Fault trees have been put in place for 100% of our products. Organizing faults and problems by level has allowed us to structure our response according to the degree of importance and adapt our response: from remote assistance to onsite intervention, as well as the need to recover the product.

AND RESPONDING FASTER

With our hotline and our telephone team 100% dedicated to our aftersales service, we are able to act faster and guarantee immediate support. Our challenge: treat 100% of all incoming requests without delay.

SPECIFIC SERVICES DEVELOPED ONLY AT POOLSTAR

EXTENDED WARRANTY FOR PROFESSIONALS.

√)......

In 2022, all our heat pumps destined to the professionals will benefit from a warranty extension to 3 years. This is a way of guaranteeing our customers support from A to Z on a technical problem or with immediate replacement of their product.

ONSITE REFRIGERATION TECHNICIAN: 2 WEEKS SPARED!

One had to think about it! Poolstar did it! To shorten repair and intervention times on our heat pumps, we have integrated a refrigeration technician into our aftersales service team with 1 promise: your product will be repaired in 48 hours. Once your broken product has been received, we can intervene directly even on the most complex problems. Innovation is also about service!

A WEBSITE DEDICATED SPARE PARTS.

Accessible at any time, this dedicated website includes an intuitive interface with the possibility of directly ordering spare parts. A good way to fight against the planned obsolescence of certain types of products.

MAINTENANCE & ACCESSORIES

HEAT PUMPS THE MUST-HAVES

These must-have models have shaken up the codes of the classic heat pump and have risen to the top of the Poolex podium.

They combine our flagship technologies - Full Inverter and integrated Wifi - and are available in a wide range of power ratings to meet the needs of the greatest number of private and public pools.

The ventilation of the Vertigo Fi and the Silent Jet Fi has been redesigned at the rear of the heat pump or upwards in order to reduce their noise level and allow them to be easily installed outside the technical room.

Convinced of their performance, we offer a 3-year Pro warranty on these heat pumps.

PREMIUM WARRANTY

Heat Pump **3years**

Compressor **7** years

Titanium coi **15 years**

As a latest generation heat pump, the Vertigo Fi aims to be efficient, economical and silent.

The Vertigo Fi heat pump combines all the features that have made the One Fi and the Triline Fi so successful, and is available in 12 capacities from 5.5 to 35 kW: the largest range at Poolex. It incorporates Full Inverter technology with a multi-frequency compressor and a variable-speed fan which considerably reduce electrical consumption and sound pressure thanks to a soft start functionality and continuous operation at reduced speed, avoiding any peak in consumption.

The Vertigo Fi combines design and cutting-edge technologies. In a vertical form and with upward ventilation requiring a small discharge area, this heat pump can be installed in a confined space.

Poolex's LED technology has been integrated on the Vertigo Fi. It is designed for ease of use with three colors indicating the operating status of the heat pump.

Convinced of the excellence of its products, Poolex warrants its heat pump for 3 years, 7 years on its compressor and 15 years against corrosion of its exchanger.

* Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified ** Average noise level at 10 m when HP is in Full Inverter mode

PREMIUM WARRANTY

The Poolex Jetline Premium included the Full Inverter technology wrapped up in an elegant design.

The Full Inverter technology comes with only its advantages. A considerable reduction in electricity consumption and in sound pressure, as well as an increased lifetime thanks to its soft start functionnality.

The heat pump becomes trendy and is proudly featured by the poolside. Its thermocoated aluminium face combines elegance and high performance to provide a heat pump easy to handle on a daily basis.

The new control pannel with wired extension at 10m features the Eco Inverter and Power Inverter operating modes. The heat pump can be controlled remotely through one's smartphone thanks to the integrated WiFi module. The extra bit to make life even easier, LED indicators have been added at the front of the heat pump to inform the user, at a glance, of the current status.

The Jetline Premium Fi keeps, however, all its features that contributed to its success: its reversible function that allows it to operate down to -15° C, its automatic defrosting capacity and its titanium twisted tech heat exchanger guaranteed 15 years.

Confident of the reliability of our products, the Jetline Premium Fi is guaranteed 3 years.

* * Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified

PREMIUM WARRANTY

Heat pump **3year**

Compressor **7**years

Titanium coil **15**years

A reduced noise level never reached thanks to a concentrate of innovative technologies.

Dressed in a sleek-looking casing, the Silent Jet Fi flaunts its cutting edge technologies right next to the swimming pool in full view of all: rear blowing and Full Inverter technology turn it into the quietest heat pump on the market.

Full Inverter technology translates into significant energy savings of up to 35% compared to an on/off heat pump. This is enabled through functionalities such as soft-start and an operating speed which continuously adapts itself according to the pool set temperature. This cutting-edge technology also means that the Silent Jet Fi is extremely quiet since its compressor and fan rarely turn at full speed.

Add to this a ventilation to the rear and the sound volume of this heat pump is further reduced to actually blend into the natural outside noise.

Discreet in its operation, the Silent Jet Fi fits perfectly around the pool and its contemporary design brings a touch of elegance to the outdoor space.

** Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified

** Average noise level at 10 m when HP is in Full Inverter mode

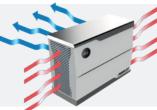

ADVANTAGES

- Full Inverter mode +35% savings
- Rear ventilation
- Never reached level of silence
- Soft start
- Compatible with salt treatment
- Twisted Tech © Titanium heat exchanger

POOLEX INNOVATION: REAR VENTILATION

Finished the flow of cold air from the front thanks to the rear blower. This solution makes it possible to significantly reduce the acoustic pressure while maintaining first-rate performance. This architecture, coupled with Full Inverter technology, makes this heat pump almost completely silent.

INTEGRATED WIFI

- Control with your smartphone
- Real time indications

SILENT

Associating Full inverter technology with the new rear-blowing architecture, the Silent Jet Fi achieves a level of silence never before achieved for a swimming pool heat pump.

Heat pump

Compressor **/**vears

Titanium coil **1 b**years anti corrosion warranty

A bold design in ABS and available in 3 powers to meet the needs of the majority of pools up to 65 m³.

In line with the Platinium, flagship of the Poolex brand, the Platinium Mini and its original design blends harmoniously into the architecture of your garden.

Available in 3 powers for swimming pools with a maximum volume of 65 m3, the Platinium Mini is equipped with all the features for which Poolex heat pumps are renowned: Full Inverter technology, WiFi control and LED indicators.

With Full Inverter technology, the heat pump operates in a more stable manner to stay close to the set temperature at all times, avoiding peaks and reducing energy consumption considerably. The Platinium Mini is a silent pump that can be proudly displayed in its outdoor space. Its vertical ventilation enables the evacuation of used air away from the surface where it stands, thus saving significant installation space.

The integrated LED indicators provide a touch of elegance while having a more than useful feature: instant visualization of the operating status of the pump.

* * Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified ** Average noise level at 10 m when HP is in Full Inverter mode

ADVANTAGES

- ABS casing
- Compact
- Vertical ventilation
- Reversible
- Eco-friendly R32 refrigerant
- Compatible with salt treatment
- Automatic defrosting via cycle inversion
- Twisted Tech© titanium heat exchanger

SUBLIMATE YOUR SWIMMING POOL

Let the boldness in you express itself! The Platinium Mini renews trends with its bold design and Full Inverter technology. Silent and economical, it can be installed near relaxation areas without particular disturbance.

Heat Pump **3years**

Compressor **7**years

Titanium coil **15years**

Because at Poolex, we do not believe in compromising striking design over performance, we have created the Poolex Platinium.

Poolex finally offers users a solution to their concern: how to efficiently hide one's heat pump? And if it 1 was instead openly featured?

Its modern design includes the latest Full Inverter technology with a guaranteed COP over 7 and absolute silence at less than 21db at 10m. As it is the case for the whole Poolex range, the Platinium also features the new, more eco-friendly and efficient R32 refrigerant.

With its three operating modes (INVERTER / ECO SILENCE / CRUISE) you can decide instantly just how you'd like your HP to operate.

Worldwide innovation: The integrated ambiance LEDs tell you straight away about the operating state of your HP.

Warranty: As of 2019, Poolex has extended the guarantee on all its compressors to 7 years for the entire premium range.

* * Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified ** Average noise level at 10 m when HP is in Full Inverter mode

Titanium coil **15**ans

The Poolex Articline adopts Full Inverter technology sported in an elegant design.

Specially designed to withstand cold climate, the Articline Fi heat pump is equipped with advanced Full Inverter technology to always bring you more savings. Thanks to a soft progressive start and continuous operation at reduced capacity to maintain the set temperature, the Articline Fi can save up to 30% on energy consumption.

The basic philosophy of the Articline Fi is to solve the problem of heating swimming pools all year round, on 100% of French territory and 80% of European territory. Therefore, the heat pump is equipped with a 4-way valve and an advanced GMCC compressor, two essential components of the defrost cycle, used in the refrigeration industry.

All this translates into remarkable performance over very low temperature ranges with an optimal COP of around 7.6 making the Articline Fi the ideal heat pump for mountainous areas or extreme climate conditions. The swimming pool becomes an attraction all year round, whatever the outside temperature, even at -25°C.

Convinced of the excellence of its products, Poolex warrants its heat pump for 3 years, 7 years on its compressor and 15 years against corrosion of its exchanger.

** Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TVD certified ** Aurona engle long at 10 m when HD is in Full Jourater mode.

Titanium coil **15years**

The Nano Turbo Premium is the top-of-the-range heat pump intended for small pools.

Don't be fooled by its small size, this heat pump is equipped with the best components currently available on the market.

Its Twisted Tech \circledast titanium heat exchanger, combined with a rotary compressor operating with the highly environmentally friendly coolant

R32, means that it can achieve a COP worthy of comparison to high-end heat pumps.

Thanks to its UV-resistant ABS casing and transport handles, you can choose how you want to use it. Installed permanently, or simply placed close to the pool for a few days, the choice is yours.

Its various operating modes means that it is just as effective heating your in-ground pool as it is at heating your above ground pool or even cooling a pool or jacuzzi.

A genuine alternative to an electric heater, its low cost of use ensures it is competitive right from the first year.

MAIN FEATURES

Ideal for collective pools Full Inverter technology Integrated WiFi connection Stainless steel structure Easy maintenance Energy savings up to 33%

PREMIUM WARRANTY

Heat pump **Syears** Compressor **/**years Titanium coil **5**years anti corrosion warranty

Performance through innovation.

With its Full Inverter Technology, the Megaline Fi modifies its output accordingly. Both compressors and fans adjust their frequencies in real time to only supply the necessary power. Consequently, electrical consumption drops as well as sound pressure to let the heat pump go unnoticed.

The touch screen control panel allows for a more intuitive use of the Megaline Fi. You can also download the Smartlife application to control the heat pump wherever you are.

Especially designed to used in coastal regions, it has a stainless steel casing and structure. The Megaline Fi is ready to face any challenge. Furthermore, its new generation Mitsubishi compressors use R32 gas, a more environmental friendly and more efficient refrigerant than the R410.

Its connections for large volumes enable it to naturally adapt itself to the flow constraints found with public equipment.

Confident of the reliability of its product range, Poolstar extends its warranty to 3 years on the heat pump, 7 years on the compressor and 15 years on the heat exchanger against any corrosion.

* * Average coefficient of performance according to European standards (Air 15°C, Water 26°C, Hygro 70%) TÜV certified ** Average noise level at 10 m when HP is in Full Inverter mode

Poolex proposes a new range of products to optimize your heat pump output.

Our Variline variable-speed pump range offers you a host of benefits, making sure it becomes your POOLEX heat pump companion:

Your heat pump output is optimized thanks to 24/7 running with low throughput which means pool temperature rises more rapidly and target temperature is maintained whilst reducing power consumption, offering up to 80% energy savings depending on use. Its 4 programmable speeds enable you to tailor the filter low based on the season as well as your pool use, be it during off-season periods, peak periods, after shock treatment or when backwashing.

The flow can be configured by simply touching the control panel, which makes things even easier. Another advantage is the low throughput which means the sand filter will be more efficient and reduce clogging.

PREMIUM WARRANTY

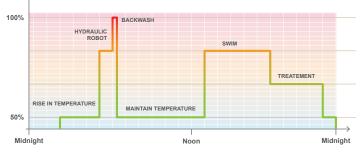

Filtration pump **3years**

Speed

The advantages of using a variable-speed pump

Your filter pump transfers water from your pool through the filter and through your heat pump. But, output levels can vary depending on swimming periods and pool treatment.

MAIN FEATURES

Economical

Better filtration

As water passes more slowly through the filter,

filtering is improved and the filter does not become

clogged as quickly.

Running a variable-speed pump at 50% for 24h instead of an On/Off pump for 8h saves around 80% of energy.

Silent

< 4 5 d B At a slow speed, sound levels are divided by 4 compared to a constant-speed pump.

Poolex

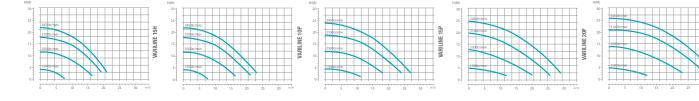

Lifespan

Increased lifetime: as the motor and compressor do not run continually at full capacity, they are used less, heat less and wear less quickly.

POOLEX CHLOÉ TREATMENT BY SALT WATER ELECTROLYSIS

MAIN FEATURES

Swinning por

3.2 g/L low salinity

Cell cleaning through cycle inversion

Automatic cover detection

PREMIUM WARRANTY

Electrolyser + cell **3years**

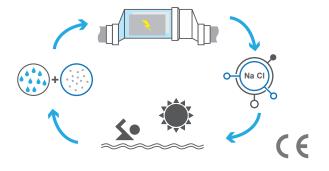

OPERATING PRINCIPLE

Electrolysis disinfection is a chemical process that transforms the salt in water into a disinfecting agent (hypochlorite ions). This hypochlorite is re-transformed into salt when it comes in contact with organic compounds (bacteria, cells) or under the effect of light, as such renewing the cycle to move through the electrolyser again. Don't focus on its compact size, the Chloé electrolyser's power demonstrates itself through its features. It works by electrolysing the salt which has been added to the pool water beforehand and provides effective, odourless disinfection without the need to add any chemical product. And it is gentle on the skin.

With its different operating modes (Automatic, Winterizing or Shock Chlorination), its intuitive control panel and, above all, its reverse polarity self-cleaning titanium cell, Chloé easily stands out. It operates from 3.2 g/L of salt in the water and is available in 4 versions, for pools from 25 to 115 m³.

Maintenance is child's play as it is equipped with different sensors. These can be used to stop the electrolysis if salt level or water flow is too low and, as such, protect the cell.

In addition, Poolex proposes an automatic cover detection module which automatically limits chlorine production when the pool is covered.

ADVANTAGES

- Natural disinfection without chemical products
- Long-life, self-cleaning cell
- Titanium electrodes
- 3 operating modes Automatic / Winterizing / Shock chlorination
- Low and high salinity level alarm
- Flow Detector
- Replacement cell available in retail

ELECTROLYSIS CELL

The Chloé electrolysis cell is made of Ruthenium-coated titanium plates.

This surface treatment reduces clogging and is combined with a reverse polarity self-cleaning system.

FLOW DETECTOR

The Chloé electrolyser is equipped with a flow detector (aka flow switch) and a salt level detection system. These two features combined enable you to safely and easily tailor chlorine production for an optimized cell's lifetime.

"SHOCK CHLORINE MODE"

One-shot intensive use? An incident impacting your pool's hygiene? The SuperChlorine mode enables you to increase chlorine production to 100% for 24h to treat your pool immediately.

MAIN FEATURES

Upward ventilation

Full Inverter Technology

Contemporary design

Indicative LED

WARRANTY

Heat Pump **2years** Compressor **5years** Titanium coil anti corrosion warranty **15years**

The Poolex Q-Line serving a majority of swimming pool owners.

With the aim of offering a product that is easy to install and use. Poolex has designed a heat pump especially for pools from 20 to 50 m³. including every best element in terms of technology. ergonomics. design and performance.

The Full Inverter technology that equips the majority of Poolex heat pumps allows for 30 to 35% energy savings over a year. mainly thanks to a compressor and a fan that function at variable speed.

Upward ventilation. which is an important space saver. makes the choice of an installation space easier.

From a user standpoint. everything has been thought to make this heat pump an easy equipment to use. Thanks to its integrated Wifi module. the digital control panel can controlled from your smartphone.

LEDs at the front indicate with a colour code whether target temperature has been reached. Its design in a rounded square shape suits any style of swimming pool and its ABS casing has the necessary resistance for a long service life.

* Average Coefficient of performance according to European standards (Air 26 °C. Water 26 °C. Hygro 80 %) TÜV Certified ** HP average noise level at 10 m in Full Inverter mode

ADVANTAGES

- Reduced floor space use
- More silent thanks to its upward ventilation
- 32mm connection
- Reversible
- Eco-friendly R32 refrigerant
- Automatic defrosting
- Twisted Tech© titanium heat exchanger
- Compatible with salt treatment

a

Upward ventilation represents significant space gain not only from a floor space standpoint. but also because the required discharge area is reduced by half.

It is also an important advantage in terms of noise reduction as most of the acoustic pressure is sent upward in the ventilation tunnel.

JETLINE SELECTION Fi NEW GENERATION JETLINE

MAIN FEATURES

Full Inverter Technology

Ultra efficient compressor

Poolex anti-freeze technology

Wide range of capacities from 30 to 110 m³

Heat Pump **2years**

Compressor **5years**

Titanium coil **15years**

Still as efficient. the new Poolex Jetline Selection Fi and its unmatched price/quality/efficiency ratio. remains a reference amongst swimming pools heat pumps.

With Full Inverter technology. this heat pump is able to vary the speed not only of its compressor. but also of its fan to adapt itself perfectly on demand. and thus effectively lower electricity consumption and acoustic pressure.

By virtue of its design and wide hydrophilic aluminium evaporation surface area, the Poolex Jetline Selection Fi operates at an outside temperature as low as $-7^{\circ}C$.

With the new Twisted Tech \odot heat exchanger technology comprising of a titanium heating coil, the swimming pool's temperature rises even faster.

Available in 5 output ratings from 7.1 to 20.1 kW, the Jetline Selection Fi is suitable for swimming pools up to 110 $m^3.$

 Average Coefficient of performance according to European standards (Air 26 °C. Water 26 °C. Hygro 80 %) TÜV Certified
 ** HP average noise level at 10 m in Full Inverter mode 5 versions up to 110 m³

ADVANTAGES

- Automatic thermostatic control
- Reversible
- Eco-friendly R32 refrigerant
- Automatic defrosting
- Twisted Tech© titanium heat exchanger
- Compatible with salt treatment
- Elegant and compact design

WIFI CONNECTION

- Control with your smartphone
- Real time indications

With Full Inverter technology. acoustic pressure drops when target temperature has been reached. The heat pump adapts its output in order maintain your pool temperature. The compressor goes almost completely unnoticed and the ventilator reduces its speed.

THE HEAT PUMP DEDICATED TO SMALL POOLS

MAIN FEATURES

Plug & Play

For pools up to 35m³

Compatible with all above ground pools

Ultra compact

Specifically designed to make life easier, the Nano Action comes equiped with 32/38 mm connectors for a quick connection to any classical filtration system.

Simply plug in your heat pump and let your swimming pool get warm.

Designed with the same specifications as a premium heat pump, the Nano Action features high efficiency in an ultra compact shell, and its light weight enables anyone to store it away once the season is over.

WARRANTY

Heat Pump **2years**

* Average Coefficient of performance according to European standards (Air 26 °C. Water 26 °C. Hygro 80 %) TÜV Certified ** HP average noise level at 10 m in Full Inverter mode Pour bassin jusqu'à 35 m³

ADVANTAGES

- Easy to install thanks to its Plug & Play system
- Compatible all above around pools, wooden pools and in ground pools (<35m3)
- Light and easy to move
- Operates from 8°C
- Connects to a standard electric plug

Reinforced printed Packaging

PLUG & PLAY

There is nothing easier than connecting your Nano Action; it doesn't require any By-Pass!

NANO ACTION REVERSIBLE

THE HEAT PUMP FOR SMALL POOLS AND SPAS

MAIN FEATURES

Plug & Play

For pools up to 35m³

Compatible with all above ground pools

Ultra compact

Reversible hot/cold

The ideal reversible heat pump for swimming pools up to 35m³.

Even more efficient, the Nano action Reversible outperforms all its rivals thanks to its reversible mode able to operate until -5° C.

With its 32/38mm and 1" connectors, it can be connected in just a few seconds to any standard filtration system, be it an above ground or in ground swimming pool, or a spa.

Simply plug the Nano Action Reversible to an outlet and heat up your swimming pool.

Designed with the same specifications as a premium heat pump, it features the same efficiency in an ultra compact casing. Its light weight enables anyone to carry it easily.

WARRANTY

Heat Pump **2years**

For pools up to 35 m³

ADVANTAGES

- Easy to install thanks to its Plug & Play system
- Compatible with all above ground pools, wooden pools and in ground pools (<35m³)
- Light and easy to move
- Reversible

- Operates down to -5°C

Reinforced printed Packaging

There is nothing easier than connecting your Nano Action Reversible; it doesn't require any By-Pass!!

POOLEX

Multi-language

user manual

3 PUISSANCES DISPONIBLES 5^{kW} 3^{kW} <u>4</u>kW

To better meet the demand, the Nano Action Reversible is now available in 3 capacities - 3, 4 and 5 kW - thanks to which it can heat swimming pools up to 35m³!

WARRANTY

Filter pump **2years**

CE

This filtration group is a formidable ally for any above ground swimming pool owner. It is composed of an integrated 60W pump and tank containing the filtering media of your choice (sand, glass or Pureflow). Compact and easy to install, this 2 in 1 group keeps the above ground pool water clean and safe. The pump is equipped with a pre-filter that retains excessively large particles.

Its 6-way valve comprises all the main functions: filtration, cleaning, drainage, rince, backwash, ...

UCONNECT

THE FASTEST SOLUTION TO CONNECT YOUR HEAT PUMP

MAIN FEATURES

Automatique self-priming

Fast set-up

Removable in seconds

Compatible with all heating systems

ADVANTAGES

- Compact et universel
- 50 mm connectors included
- Designed for intensive use
- -2 x 5m piping

WARRANTY

Heat pump **2years**

The Poolex UConnect kit is compatible with all swimming pool heat pumps of any make. It is delivered with 5 metre long piping and $1\frac{1}{2}$ " universal male adaptors.

The Poolex UC onnect kit is powered via a 230 V/12 V transformer that can be linked to your heat pump or directly to your electrical system.

The Poolex UConnect kit can be set up by your pool in just a few minutes. There is no need to affix it and it can be removed at any time.

Its self-priming system ensures simple fast startup. It is compatible with all swimming pool heat pumps of any make.

It can be installed without the need for a by-pass kit or additional pump. Designed for intensive use, Poolex UConnect has a warranty of 2 years.

Piping supplied: Ø 50 mm (1'½) : 2 x 5m

Media weight	130 g	500 g
Sand equivalent	10 kg	40 kg

CLEANPAC

THE IDEAL CLEANER FOR HEAT PUMP MAINTENANCE

CLEANPAC the extra-powerful cleaner from Poolex, has been tested to make your life easier.

Over time, your heat pump evaporator can become clogged up. Dust, plant and organic matter can obstruct it, reducing its performance, and even causing it to fail.

CLEANPAC from POOLEX comes in a bottle with an adjustable spray nozzle as well as a flexible body to access the most inaccessible parts of the evaporator.

Its combination of degreasing agents provides perfect efficiency right from first use, even for the dirtiest of evaporators, without affecting your heat pump.

For optimum use in full safety, follow the instructions on the bottle.

Content	1 L
Reference	PC-CLEAN100
Amphoteric surface-active agents	Less than 5 %
Non-ionic surface-active agents	Less than 5 %
Preservatives	Methylisoazolinone Methylchloroisothiazoninone

FORMIDRA INNOVATION HYBRID TECHNOLOGY

Formidra's hybrid technology, it's the promise of a hot shower all year long, irrespective of sunlight.

- Solar shower connection:

Simply connect your shower to a cold water outlet in the garden and let the direct sunlight warm up the water.

- Domestic shower connection:

Add a connection to a hot water outlet from a hot water tank to enjoy a warm shower in any season and irrespective of usage frequency.

Both systems can be used independently.

MAIN FEATURES

Recyclable HDPED structure

Large 44 L Capacity

Uses solar energy

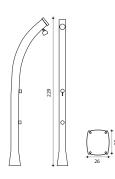

Available in 5 colours

Foot rinse included

The Happy 4x4 solar shower has the largest water reservoir in its range. Its 44 litre reservoir is heated solely by the sun, making it 100% eco-friendly.

Made of high-density polyethylene, its elegant design in 5 different colours and its curved shape blend into any surroundings.

A simple connection to a water inlet is enough to supply this solar shower. Its flanged base ensures the easy installation and stability of the Happy 4x4.

MAIN FEATURES

Can be installed on any level ground

Compatible all Formidra showers

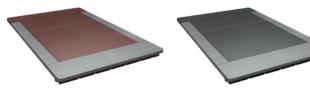

Anti-UV Material

High quality wood looking composites slats

Before and after a swim, on your return from the beach or after your run, your Formidra outdoor solar shower is waiting for you. As you enjoy it and let the water run over your shoulders, make sure you keep both feet on the shower base. This will prevent you from taking in water!

The Formidra shower base is a real added value to your outdoor shower installation. In wood or anthracite colour, it blends perfectly with the ambiance of the space you have created. It is quickly installed on any flat surface and provides an efficient means of water drainage. The well-thought-out plateform, with dimensions of 75x97 cm, offers a stable space where you can easily rinse yourself.

Its composite design makes this grating resistant to UV and external elements. No need to treat it over the seasons, it does not accumulate mold and does not warp. You will spend more time enjoying your solar shower space than maintaining it!

P.101

\bigcirc CARDIO

The pedal relies on water's hydrodynamic force to create gentle resistance with massaging effect, stimulating blood circulation in the legs. Smooth pedalling fluidity is most respectful of body joints.

🖄 ENDURO

Hydraulic resistance is powered with a blade system that resembles that of a water mill: the blades use the force created by mixing the water. Hydraulic force effects lie in the duration of the training sessions and in the intensity of the effort.

SPINNING

Mechanical resistance is powered with a stainless steel wheel fitted with a break pad to adjust the effort in a precise way and therefore personalize the training. You can simulate an uphill for more efficient muscular reinforcement with immediate effect!

AGGRESSIVE DESIGN AND TONING GUARANTEED!

This MAX aquabike, and its distinguished design as well as premium ergonomics, offers performance and lightness.

It combines the power from its 5 blades (fixed hydraulic resistance) to the variable resistance from its set of pedals to form a duo of intensity, ideal for cardio training as well as muscle strenghtening.

Its marine-grade anodized aluminium 6063 T6 structure makes it a lightweight at 15.9 kilograms.

Handling a lighter aquabike and removing it from the pool becomes easier. The galvanic node reinforces the aquabike protection for usage in all types of waters. Barefoot usage, fluidity in spinning and powerful resistance are appreciated elements.

AQUA DOUBLE SPEED PEDALS

These pedals, product of innovative technology, offer variable resistance and increase the level of difficulty when unfolding their flap.

Aluminium Technology

5-BLADE HYDRAULIC RESISTANCE

The hydraulic system with 5 fixed blades, housed by the pedals, creates an intense resistance that works out muscle reinforcement as well as your cardio. The effort simply increases with pedalling speed, allowing for an instant adjustment to every muscle exercise. Easy to use and very efficient, its design will also seduce you.

Hydraulic resistance

ADS pedals double speed

Ideal for defining the silhouette

Metal parts **2years**

Wearing parts **6months**

With the Lanabike Evo, Waterflex revolutionizes aquabike practising in a private swimming pool.

The Aqua Double Speed pedalling system on this aquabike provides a hydraulic resistance suited to cardio exercises while preserving joints health.

Equipped with an anodized aluminium structure, the Lanabike Evo is easy to handle for the person wishing to enjoy her/his swimming pool and keep fit. This aquabike is accessorized with a comfort saddle, a bottle holder and an insulated water bottle making it a pool bike with complete comfort ready for a fun cardio session.

AQUA DOUBLE SPEED PEDALS

Designed in Aluminum and Stainless steel, ADS pedals incorporate a folding flap mounted on a hinge. It unfolds and locks in a single gesture and increases the hydraulic resistance by 54%. You can amplify your cardio session.

WATERFLEX INNOVATION

Its structure in anodized T6 6063 Aluminium grants it ultra-light weight of just 11 kg, perfect for placing it in and removing it from the pool whilst at the same time granting it perfect rigidity. The Lanabike EVO, with its large basestands and its silicone glides, is easy and reassuring to use. Thanks to its multi-adjusting base-stands, saddle and handlebar, along with its variable-resistance pedals, the Lanabike Evo is an incredible multipurpose bike.

ELLY « NORDIC WALKING

The Elly swimming pool cross-trainer is a complete userfriendly exercise apparatus that combines the benefits of rowing, crosscountry skiing, stepping and cycling.

The Elly uses about 80% of the muscles in the body synchronously! The secret lies in an elliptical movement designed to reproduce as closely as possible the natural movement of running whilst protecting the joints from impacts. The Elly offers the user fluidity of movement maximizing leg workout through an angle of incline of the pedals. The effort is further increased through the use of oscillating lever arms with equipped with wide perforated blades.

Designed 100% in stainless steel, the Elly is compatible with all types of water (sea water, chorinated or bromine). Easily move the Elly around thanks to its silicone wheels.

160 cm

Relax in the comfort of the Gaïa Bella as a duo. The heat provided by the steam stove stimulates blood circulation and soothes muscles and joints. Immune defenses are also boosted and toxins eliminated through sweating. Your relaxation session is enhanced with a set of colours conducive to chromotherapy healing.

The Gaïa Bella cabin is equipped with two benches over two levels. Fully enjoy your relaxing moment lounged on the foldable upper bench, which ergonomics have been carefully studied right through to the integrated headrest.

This cabin and its Scandinavian charm in light-coloured spruce wood with contained dimensions will enhance your garden. Its glazed surfaces covered with louvered shutters add a certain appeal to the round shape of this outside sauna. Exterior sauna

THE DESIGN & RESTFUL SPA AT THE BEST PRICE

A MOMENT OF SHEER RELAXATION

SEMI-RIGID RANGE

By offering an ideal compromise between an inflatable and an acrylic spa, our range of semi-rigid spas stand out from the myriad offers of portable spas.

The semi-rigid spa is made of insulating foam walls and can be installed just as quickly as an inflatable spa. Discover the Vita Premium, the Vita and the Octopus, all elegant spas accommodating between 4 and 6 people.

A MORE RIGID SPA = A MORE DURABLE SPA

DID YOU

KNOW?

The air expands with the effects of the heat. During the hot hours, the inflatable spa seems to be "over-inflated". However, temperature drops in the evening and in the offseason. There is, therefore, a slight decrease in the air pressure inside de spa walls. It s therefore necessary to inflate your inflatable spa regularly.

A perfectly-affordable high-end spa!

Best-seller in the NetSpa range.

The Octopus spa marvellously combines the advantages of a large 4-6 person spa, with the outside dimensions of a 4-person inflatable spa. Its structure, made of 8 cm foam panels, assembles in just a few minutes to simultaneously provide the rigidity required as well as indispensable insulation and comfort. The interior liner incorporates an insulating mat, as well as vertical bubble channels, perfect for relaxing the back.

Its smart Netspa motor block heats, filters and diffuses relaxing bubbles, ensuring less maintenance and more pleasure than ever.

SPA **2years**

The Vita, a real spa with luxurious finishes, stands out with its stylish and elegant design.

Its 8 cm foam structure grants the Vita several advantages: fast assembly, greater rigidity compared to inflatable spas and better insulation thanks to its foam panels.

Optimal comfort is guaranteed with a foam mat directly integrated into the interior liner ensuring comfortable sitting, whilst the spa is top-edged with laminated PVC offering an elegant effect.

The NetSpa motor bloc is an all-in-one unit that controls the filtration, heating as well as relaxing bubbles diffusion in the spa. It is controled at a simple touch of the finger.

An elegant, round-shaped spa

The Boa's round shape and croc-effect layer give it a luxury outlook and provide a better protection. Suitable for 5 to 6 persons, the Boa is equipped with the Netspa motor unit, which heats, filters and diffuses relaxing bubbles. With its classical round shape, the Boa is suited to the largest domestic use.

Thanks to its 100% safe differential power socket, the spa provides optimal protection against electric shocks and its lockable cover means it can be thermally insulated and inaccessible to children if ever adults were absent.

Poolstar Pure innovation

ARTICLE 1 - APPLICATION OF THE GENERAL TERMS AND CONDITIONS OF SALE

These General Terms and Conditions of Sale apply to professional customers (hereinafter referred to as «the Purchaser») who wish to commercialize POOLSTAR products (hereinafter referred to as «the Equipment»).

The act of placing an order implies that the professional Purchaser accepts the General Terms and Conditions of Sale hereof fully and without any reservation whatsoever, to the exclusion of any other document, such as prospectus, catalogues, issued by POOLSTAR, which are for informational purposes only. (Non-contractual visuals which may be modified at any time at our initiative)

No special terms and conditions can prevail over the General Terms and Conditions of Sale hereof unless they are formally accepted by POOLSTAR in writing. Terms or conditions of a contrary nature put forth by the Purchaser shall, unless explicitly accepted, be non-binding over POOLSTAR, irrespective of the time such terms or conditions were brought to its attention.

ARTICLE 2 - ORDERS

Orders are final only when they have been confirmed in writing by POOLSTAR.

Once the order has been confirmed in writing by POOLSTAR, it is deemed firm and final and cannot be amended in any way and binds the Purchaser to pay it.

The General Terms and Conditions of Sale hereof are applicable to any quote made.

ARTICLE 3 - DELIVERY

Unless explicitly stipulated otherwise, delivery shall take place within a maximum period of 60 days following the date of receipt of payment of the price by POOLSTAR.

The deadlines are indicative and any possible delay does not entitle the Purchaser to cancel the sale, nor to refuse the Equipment and shall not give rise to any deduction, compensation, penalty or damages

The Equipment shall be delivered to the recipient's address and shall not be unloaded unless explicitly agreed between the two parties. The transfer of risks on the Equipment, even in the event of sale agreed carriage-free, takes place as soon as it leaves the POOLSTAR warehouses

The Equipment is shipped at the risk and peril of the Purchaser who is responsible for making any observations necessary in the event of damage or partial delivery. The Purchaser shall enter their reservations on the delivery note, and possibly refuse the Equipment in the event of damage observed. They must then confirm their reservations in writing (registered letter with acknowledgement of receipt) within 3 days pursuant to Article L133-3 of the French Commercial Code

(For information, the sole mention «subject to unpacking» displayed on the delivery note, cannot be used to make a claim).

Delivery condition for mainland France, carriage free for minimum €1,650 net VAT orders.

Shipping rates hereinafter. (excluding Internet, home delivery and acrylic spas). Transfer of ownership and retention of title clause

POOLSTAR RESERVES OWNERSHIP OF THE EQUIPMENT UNTIL FULL PAYMENT IS RECEIVED. irrespective of the terms and conditions of delivery and payment, it being understood that the risks are borne by the Purchaser as soon as the Equipment leaves POOLSTAR's warehouses

Consequently, the Purchaser must take out an insurance policy covering delivery, risks of loss, theft and damage to the goods sold, as well as the damage they may cause to the goods themselves. Individualization of Equipment

The Purchaser is responsible for ensuring Equipment identification and individualization and must monitor that they do not unpack or merge items into common stock. In the event of receivership or judicial liquidation, the Purchaser undertakes to have the administrator, the agent or the claims representative draw up a complete list of the Equipment. Likewise, POOLSTAR can unilaterally, after sending a formal notice. draw up or have a third party draw up an inventory of its Equipment in the possession of the Purchaser, who undertakes, henceforth, to allow free access to its warehouses, stores or other premises for this purpose.

Claim

In the event of non-payment by the Purchaser, and without waiving any of their rights, POOLSTAR may demand, by registered letter with acknowledgement of receipt, the return of the Equipment at the Purchaser's expense and risk.

Receivership or judicial liquidation

The Purchaser undertakes to inform POOLSTAR of any change that may occur in their situation, and in particular of their declaration of insolvency

ARTICLE 4 - COMPLIANCE

Upon delivery of the Equipment, the Purchaser shall ensure that it is in good condition and that it complies with the order.

In the event that the ordered Equipment delivered is non-compliant, the Purchaser shall inform POOLSTAR in writing within one month and shall include any documents showing the noncompliance of the delivered Equipment. If POOLSTAR confirms the non-compliance of the Equipment, the Purchaser may, at POOLSTAR's choice, obtain either a replacement of the Equipment or a refund of the purchase price within thirty (30) days following the Purchaser's written request.

Moreover, the Purchaser has the right to return the Equipment to POOLSTAR provided it is in perfect condition in its original packaging.

Prior to returning any Equipment, the Purchaser must contact POOLSTAR's customer service to learn about the return procedure.

ARTICLE 5 - GUARANTEES

Legal guarantee for hidden defects (Articles 1641 and following of the French Civil Code) and Liability as a result of defective products (Articles 1245 et al of the French Civil Code). POOLSTAR guarantees the absence of hidden defects which would make the sold Equipment unfit for the use for which it is intended, or which would diminish this use to the point that the Purchaser

GENERAL TERMS AND CONDITIONS OF SALE

would not have purchased it or would have proposed a lower price if they had been known of its existence.

. The defect must have existed prior to the sale.

This guarantee covers a 2-year period.

The Purchaser can only benefit from the guarantee if they notify POOLSTAR by registered letter with acknowledgement of receipt within one month following the detection of the defect.

Contractual guarantee

The Purchaser undertakes to familiarize themselves with the guarantee proposed by POOLSTAR and to transmit it to intermediaries and end users.

The Equipment is delivered with a notice, specifying the particularities of the guarantee by product range.

The contractual guarantee starts on the date specified on the sales invoice for the new product sold by the Purchaser to their end user.

For any product (apart from any product category specifically mentioned on the notice), the guarantee covers a 2-year period.

Any intervention carried out within the framework of the guarantee does not extend the duration of the guarantee.

The invoice is due and conditions any service provided under guarantee.

In any case, the guarantee hereof is limited, depending on the case, to product repair or exchange for a new or reconditioned product, or reimbursement via a credit note for the Equipment which POOLSTAR acknowledges as defective.

Any costs for installing, removal, emptying, filling, processing (products, etc.) and carriage are borne by the Purchaser. The shipping costs of the repaired or replaced product and delivered to the Purchaser are borne by POOLSTAR as are workshop labour costs. Any customs fees or local taxes are the sole responsibility of the Buyer.

Any Equipment which may benefit from the guarantee must be submitted beforehand to the POOLSTAR after-sales service by creating an after-sales service record on the platform: https:// support.poolstar.fr where all specific terms and conditions concerning the after-sales service may be found.

General Limitations

The contractual guarantee does not cover issues arising in whole or in part from a negligence. misuse, abusive use or unconventional use, insufficient or improper maintenance, incorrect repair. failure to observe the instructions for installation, for storage, or defects attributable to external causes (natural or technological catastrophe, etc.).

The contractual guarantee does not cover consumables or repairs carried out by a third party not authorized by POOLSTAR. Snags, holes, tears, stains, natural wear and tear, and external accidents are excluded from the guarantee

The guarantee shall be cancelled if the product is transferred to a third party.

POOLSTAR shall not guarantee the loss of profit generated by the interruption of an operation due to non-compliance of the Equipment sold.

Liabilities

POOLSTAR cannot be held liable under any circumstances for damages of any kind whatsoever, which could be the direct or indirect consequence of bad adaptation of the Equipment or its defective use.

Equipment Compliance

In the event that the Equipment is compliant, costs related to processing the return and any costs incurred by the claim shall be borne by the Purchaser and may be invoiced to the latter by POOLSTAR. Quote and study advice

Any ex-guarantee repair shall be subject to a quote given beforehand. Only written quotes are accepted and they are valid for a period of one month.

Advice, recommendations and technical support provided for free are for information purposes only and can in no way expose POOLSTAR to liability.

If during repair following the first accepted quote, the defect of one or several additional components appears, we undertake to transmit a new quote for acceptance.

Equipment retention period

POOLSTAR shall stock the Equipment on its premises for 45 days from the date of reception in POOLSTAR's workshops. After this period and, in the absence of agreement from the Purchaser as to the quote for the repairs to be carried out, the Equipment shall be returned. In this case, the carriage and expertise cost shall be borne by the Purchaser.

ARTICLE 6 - PRICING

POOLSTAR shall grant discounts to the Purchaser, pursuant to the discount rate in effect which shall be transmitted to the Purchaser

The Equipment is supplied at prices net of VAT in effect on the date the order is received.

Prices are reviewable without notice pursuant to decisions taken by POOLSTAR

The prices indicated include discounts, reductions and rebates granted unless otherwise specified on the purchase order.

Any claim concerning the invoice must be notified to POOLSTAR by registered letter with acknowledgement of receipt, at the latest within 15 days of invoice reception, failing which it shall not be taken into account.

ARTICLE 7 - TERMS AND CONDITIONS OF PAYMENT

The Equipment is payable at the time of order unless specific conditions have been granted to the Purchaser and agreed in writing by POOLSTAR.

Only the receipt of payment by POOLSTAR will trigger POOLSTAR's obligation to deliver unless otherwise agreed in writing

Moreover, if, during a previous order, the Purchaser failed to meet any of their obligations, refusal to

POOLSTAR

sell may be made, unless this Purchaser provides satisfactory guarantees.

Failure to pay the order on its due date shall render the entire amount payable due immediately without prior formal notice, and shall lead to the suspension of deliveries as well as the application of flat-rate compensation of \notin 20 net VAT.

Any significant change in the Purchaser's financial situation is likely to lead to a revision of the terms and conditions of payment, with the seller solely responsible for taking a decision without having to justify it.

In the event of late payment on the due dates, the sums shall automatically bear interest on the basis of the rate of the ECB advances increased by ten points without this clause adversely affecting the due date of the debt, and compensation for recovery costs, at least equal to the fixed minimum amount provided for under the applicable texts (Article L441-6 of the French Commercial Code and its implementing decree) shall be applied.

In the event of non-payment by the Purchaser of one of the orders, POOLSTAR has the right to postpone manufacturing and delivery of all other orders and / or to terminate them, without the Purchaser being able to claim any compensation from POOLSTAR for this.

Where applicable, if the term of payment comes after reception of the order, no claim on the Equipment (defect, etc.) is conditional on payment until proof of its defectiveness has been provided and admitted by POOLSTAR before the due date.

If it is applicable, a suspension of payment is acceptable only on the invoice value of the incriminated components of the Equipment in question.

As regards the storage of the aforementioned goods, the timeframe cannot exceed 12 months as of the date of reception of the goods.

Otherwise, POOLSTAR may charge a storage fee of €15 net VAT per month and per product.

If necessary, deposits received by POOLSTAR shall be retained by way of damages if the Purchaser does not respect their commitments, until the amount of the damages, which shall include in particular all costs incurred (e.g. manufacturing, transport, storage, etc.), is fixed. Credit note management:

Credit notes issued by POOLSTAR are deductible from a future order and shall not be reimbursed, except by virtue of prevailing provisions of law.

ARTICLE 8 - PENALTY CLAUSE

In the event of legal proceedings, the Purchaser shall be liable to pay, by way of damages, compensation equal to 15 % of the amount of the sums due, with a minimum of €152 net VAT. This increase is established as a penalty clause and cannot deprive POOLSTAR of being granted additional damages if its loss is higher than this amount.

ARTICLE 9 - INTELLECTUAL PROPERTY RIGHTS

The Purchaser shall refrain from reproducing or using POOLSTAR's name, logo or trademarks in any media, informational or online communication to the general public or to the Purchaser's own customers.

Any technical documents transmitted to the Purchaser remain the exclusive property of POOLSTAR, the sole owner of the intellectual property rights on these documents, and must be returned to POOLSTAR if and when requested.

The Purchaser undertakes not to make any use of these documents which may infringe POOLSTAR's industrial or intellectual property rights and undertakes to refrain from disclosing them to any third party without POOLSTAR's prior consent.

ARTICLE 10 - PERSONAL DATA PROTECTION

POOLSTAR is committed to respecting the security of the personal data transmitted by Purchasers and to process it pursuant to regulations in effect.

POOLSTAR informs the Customer that this data shall be used by its internal services, its partners and its subsidiaries for:

- Processing the Purchaser's order, tracking the order, managing invoicing and payment and any claims. This processing is based on the execution of the agreement concluded with the Purchaser and the respect by POOLSTAR of its legal obligations regarding invoicing.
- Strengthening and tailoring communication, in particular by sending newsletters and letters, offers
 and specific emails on news of its products. This processing is based on POOLSTAR's legitimate
 interests to carry out communication and prospecting campaigns related to its business activity.

The supply of the data requested when the order is placed is of a contractual nature and is compulsory to conclude the order. Otherwise, the Purchaser shall not be able to place the order. Processing

Personal data is stored in an active base for a period of four (4) years from the last order, on a secure server within the European Union. Personal data related to order execution can be stored in intermediate archiving for a period of five (5) years from the date of the order; period required for POOLSTAR to establish, exercise and/or defend its rights in court (limitation period).

Moreover, POOLSTAR stipulates that if the Purchaser changes their mind and no longer wishes to receive promotional emails or letters, they may request to unsubscribe at any time by writing to «contact@poolstar.fr». (right to oppose).

Furthermore, under the conditions provided for by regulations in effect, the Purchaser may at any time exercise their rights to access, rectify or delete information concerning them, their right to limit processing and their right to the portability of their data, their right to provide instructions as regards their personal data after their death, by sending their request (specifying email address, first name, surname, postal address):

By email to «contact@poolstar.fr».

Or by postal letter to the address of the head office mentioned at the bottom of the page.

Finally, the Purchaser has the right to make a claim before the competent authority (the CNIL (French Data Protection Authority) in France).

ARTICLE 11 - NULLITY OF A CLAUSE

The nullity and/or cancellation of one of the provisions and/or clauses of the General Terms and Conditions of Sale hereof shall in no way affect the validity of the other provisions and clauses which remain in effect between the parties, unless the spirit and/or purpose of the agreement concerned is altered by such nullity and/or cancellation.

The parties to the agreement undertake to renegotiate in good faith any provision and/or clause that

is null or invalid, pursuant to the law and reflecting the economic purpose of the General Terms and Conditions of Sale.

ARTICLE 12 - CHOICE OF JURISDICTION

The General Terms and Conditions of Sale hereof are governed by French law to the exclusion of any other international convention applicable including the Vienna Convention on Contracts for the International Sale of Goods (CISG) of 11 April 1980.

For all disputes relating to sales made by POOLSTAR and the application or interpretation of the General Terms and Conditions of Sale hereof, ONLY THE COMMERCIAL COURT OF AIX EN PROVENCE SHALL BE COMPETENT, even in the case of summary proceedings or multiple defendants.

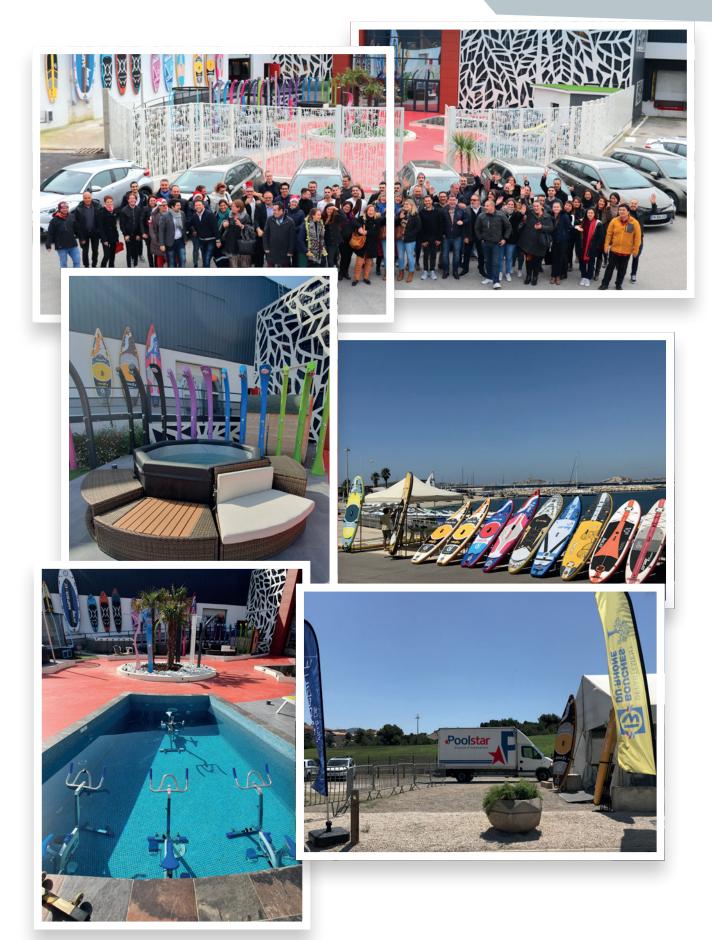

The issue and acceptance of bills of exchange, direct collection or any other method of payment does not constitute a novation or derogation to this clause conferring jurisdiction.
