OUR BRANDS

Paddle with Passion

A COMPLETE RANGE FOR ALL PRACTICES

ZRAY offers the most complete range of Stand-Up-Paddles available on the market today. With boards of all sizes and personalities from All-Around, Touring, Windsurfing to Racing you are sure to meet your customers' wildest requests.

THE SKIFFO FAMILY

The Skiffo range of Stand-Up-Paddles has been designed and perfected to create memorable outings as a duo, with family or with friends.

WATTSUP IS THE GOOD DEAL!

The WattSup brand is designed for the public at large and of fers all a beginner is requiring to start exploring the wonders of water gliding from the youngest age.

A complete range that adapts itself to small frames, female body shape, solitary riders and those who prefer to share fun time on the water with friends and family.

HIGH PERFORMANCE INFLATABLE SUP

Design, Lightness, Rigidity, Durability and Eco-friendly Coasto is constantly evolving to remain at the forefront of progress and brings carefully studied solutions for the comfort of the rider. To meet today's market demand, every Coasto Stand-Up-Paddle is available either as a single chamber or double chamber solution. All material used in their conception is recyclable.

Poolstar, expertise with a personal touch

Poolstar has grown considerably since it was created with just 3 employees in 2006. Today, it counts over 60 members of staff in France and around the world. But, in our company, human touch remains the core of our activities. Customer satisfaction is our key priority.

Flexible and tailor-made services

As a truly-flexible company, Poolstar provides personalized responses according to your profile, requests and constraints. A dedicated support for exchanging with sales teams in the field and in our offices enhances communication with our customers.

A close relationship

Poolstar's organization is designed in such a way that every customer benefits from a close, professional relationship. You work with a dedicated contact person who knows your customer record fully. Your calls are answered directly by a real person and not an automated machine. Sales staff in the field and support teams work constantly hand-in-hand to ensure optimal response quality.

Commitment to continual improvement

In an effort to always improve customer satisfaction, Poolstar carries out studies and uses those results to progress. Driven by a commitment to continue our service quality improvement, we remain constantly attentive to your needs.

PADDLE with Passion

EXPLORE AND ENJOY YOUR ADVENTURE

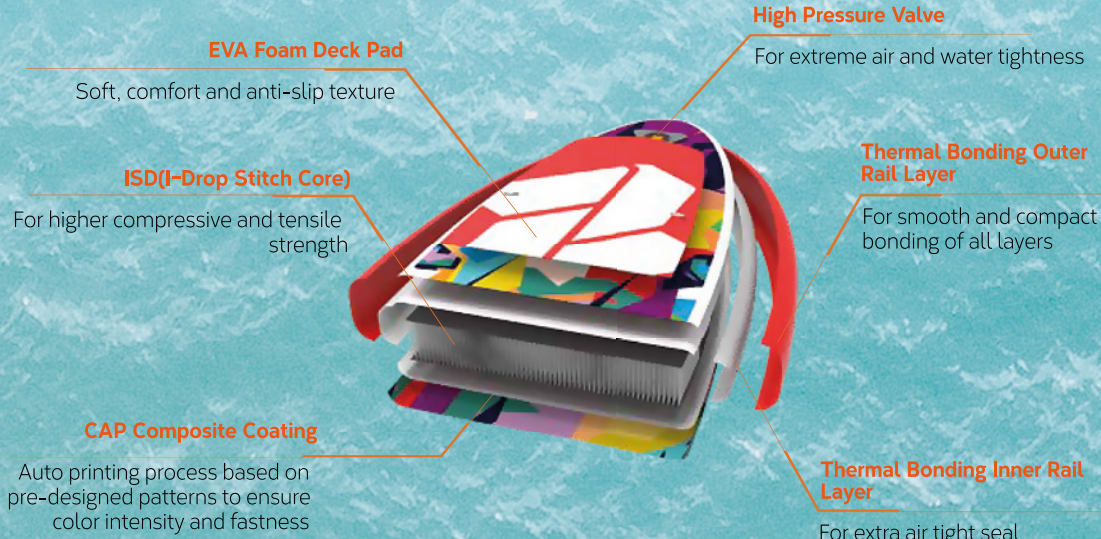

KAYAK & BOAT

EXPLORING & CRUISING

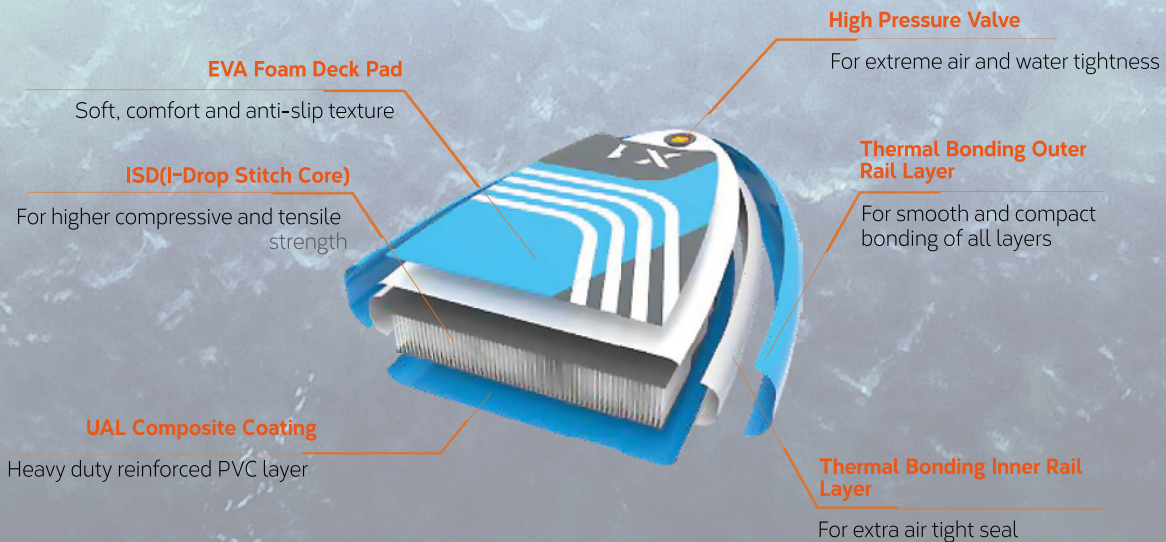

Cosmetic Art Printing Technology

Cosmetic Art Printing (CAP) Technology is an auto printing process based on pre-designed patterns at high resolution using the best material of our board. It allows print at single colors and complicated textures and ensures color intensity and fastness to resist over time.

Ultimate Agile Light Technology

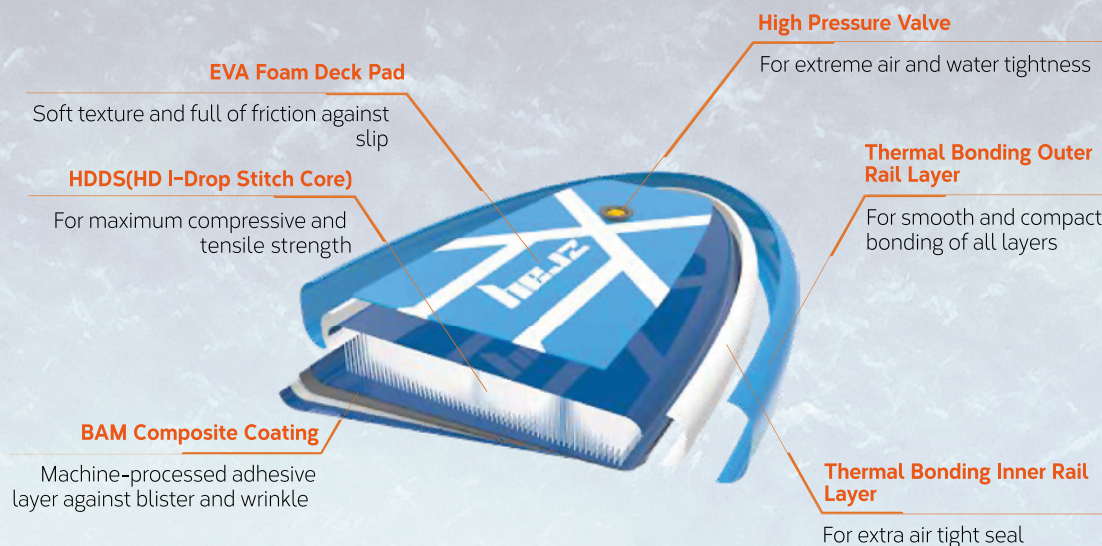

Specially developed for the portable boards. Extremely decrease the weight of boards to transport a single packaged board easily anywhere.

Balanced Anti-bending Motility Technology

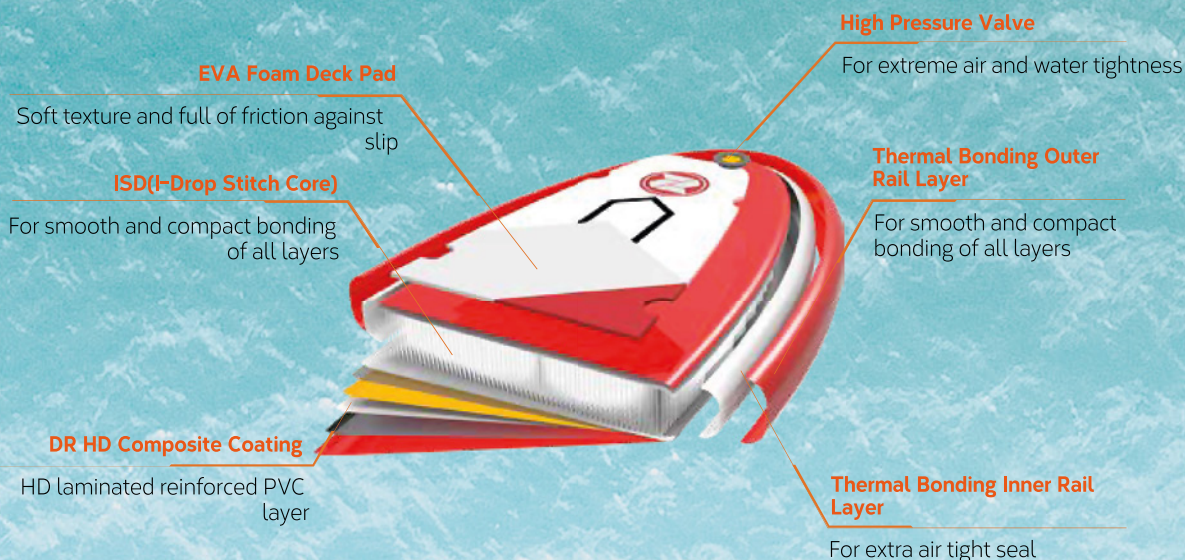

A epochal innovation for the construction of our performance boards. We develop it to keep the balance between stiffness and weight of boards.

Duplex Rigid Heavy Duty Technology

A premium construction especially designed for racing lines. It provides an outstanding durability/price/performance ratio with its multilayer coatings.

P1-34151
10'6" x 32" x 6"
320x81x15cm

LEO

NOBLE & POWER

The inspiration comes from the Leo meteor shower. The passionate and energetic image of the Lion King is supplemented by stained glass effects of various colors, just like the feast of the falling stars of Leo. When you are paddleboarding, you dominate the waters under your feet, just like the lion king's supreme power.

P2-34150
10'6" x 32" x 6"
320x81x15cm

ALIEN

FANTASY & IMAGINATION

No one doesn't like things with sci-fi colors. Just like the design of this board, the sci-fi elements of aliens are integrated into it, combined with SUP, a leisure water sport, to relax with a fantasy world.

P3-34152
10'6" x 32" x 6"
320x81x15cm

DOODLE

PAINTING & JOY

We all scribbled when we were young, even if we are blamed, we are still tireless, and that joy is hard to find now. This board combines doodle painting and joy with stand-up paddle boarding, allowing you to experience tireless sliding.

P4-34153
10'6" x 32" x 6"
320x81x15cm

SKETCH

NATURE & PASSION

Beach, nature, and surfing have always been the core of summer. The design combines the natural scenery of the beach, the sunset, and the surfers, giving the paddle board a new meaning. With this paddle board, you can feel the heat of the beach, the natural breeze, and the passion for sports at any time.

Art Deco Collection

Cosmetic Art Printing Technology

ArtDeco Series is a new series adopting special printing technology. We integrate vitality, fantasy, abstraction, realism, exploration, adventure and other trend elements into the board, combined with our UAL technology, and finally realize a series that can integrate highly personalized patterns.

Cosmetic Art Printing (CAP) Technology is an auto printing process based on pre-designed patterns at high resolution using the best material of our board. It allows print at single colors and complicated textures and ensures color intensity and fastness to resist over time.

Our Evasion SUP is ideal for anyone who wishes to discover this new sport. With a width spanning between 30" and 32" depending on the model, and a thickness of 5", this SUP offers all which one is looking for to take on the calm waters of a lake for the first time.

With well-thought dimensions in width and length, all three models offer excellent stability. Once a little

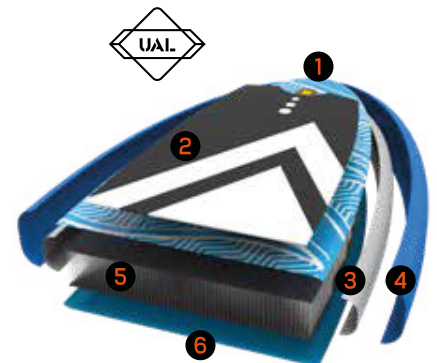

more experienced, why not challenge yourself and increase your sliding speed with the 11' board. Complete for beginners and for longer rides, the Evasion can also be turned into a kayak-SUP with a seat that is fixed to the board (optional). The UAL technology and the drop-stitch concept used in these SUP make them extremely light and rigid, for optimum sliding on the water surface.

Ultimate Agile Light Technology

Specially developed for the portable boards. Extremely decrease the weight of boards to transport a single packaged board easily anywhere.

1. **High Pressure Valve.** For extreme air and water tightness.
2. **EVA Foam Deck Pad.** Soft, comfort and anti-slip texture.
3. **Thermal Bonding Inner Rail Layer.** For extra air tight seal.
4. **Thermal Bonding Outer Rail Layer.** For smooth and compact bonding of all layers.
5. **ISD(I-Drop Stitch Core).** For higher compressive and tensile strength.
6. **UAL Composite Coating.** Heavy duty reinforced PVC layer.

Complete for beginners, the Evasion 9' can also be turned into a kayak-SUP with a seat that is fixed to the board (optional). The UAL technology and the drop-stitch concept used in these SUP make them extremely light and rigid, for optimum sliding on the water surface.

With a width at 30" and a thickness of 5", the stability of the Evasion 9' offers all which one is looking for to take on the calm waters of a lake for the first time. Its 9' length, which plays an important role in the board's stability, remains however small enough for this this board to be manoeuvred with extreme ease enabling the rider to confidently take on any turns.

With a board length of 9', a more experienced rider can rely on the Evasion Deluxe to practice his/her speed and bring his/her taste for adventure even further. Its width at 30" and its thickness at 5" brings excellent stability to this board for comfortable long rides. The Evasion Deluxe can handle up to 242 lbs (110 kg),

enough to bring along a picnic, and, why not, anything one might need for a discovery walk at the docking point. The UAL technology used in this board and its 15 psi pressure when inflated give it high compactness, comparable to rigid SUP. Its 4 mm EVA non-slip central and kick pad insures the user a smooth ride.

The Evasion Epic brings a sense of freedom thanks to its dimensions that grant this SUP great versatility. With its 11' length, this board gains in glide and speed. Its 32" width brings incomparable ease of use to the rider, who will be able to move around or shift its position without fear of toppling over. The Evasion Epic is equipped with a 4 mm non-slip EVA central

pad for the rider's comfort. The Evasion Epic has an outstanding load capacity. It can support up to 269 lbs (122 kg) for additional hiking equipment or to share a moment outside with family. The kayak seat (optional) that can be installed with the integrated d-rings, and the bungee included will be an invitation to anyone wishing to share in a moment out in the nature.

- 6. BAM Composite Coating :** Machine-processed adhesive layer against blister and wrinkle
- 7. Double Chamber Structure :** The second air chamber for extra safety and rigidity

PERFORMANCE, EXPLORER & CRUISING

The longer length gives a fast and easy glide without compromising stability. The wider nose and squarer tail make the Touring boards more stable, especially for harsh conditions like side chop and moderate winds. V outlines introduce a new sporty design, meant for fast cruising. Double cargo systems make paddlers able to carry much more equipment.

Key Feature

- BAM & DCS technology
- Patented double chamber structure. Conform to ISO6185.
- 6" (15cm) drop stitch core material.
- Triple bottom panel fins.
- Stainless steel d-rings on the deck and at the tail.
- Optimal air pressure up to 15 psi.

The Skiffo Family

The Skiffo range of Stand-Up-Paddles has been designed and perfected to create memorable outings as a duo, with family or with friends.

TECHNOLOGY AND AESTHETICS

From a standpoint technology, the Skiffo boards have nothing to envy to those preferred by the professionals. The brand leaves nothing to chance: the **3 Suncruise models** as all benefit from a double layer thermally bonded, and the drop-stitch method has been applied to all SUPs. These tested technologies maximize the boards' compactness and rigidity, improving the Stand-Up-Paddle gliding capacity.

Two models are especially suited to beginners and recreative usage:

Elle, Lui - for which Skiffo has created very distinctive trendy personalities. Elle and Lui, with bright pink and blue colours, invite to an outing as a duo.

A PRACTICAL STAND-UP-PADDLE

Once deflated, these SUPs and all equipment are easily put away in their bag that can be stored in a trunk, a closet or even under the bed. For an easy outing, the Skiffo Stand-Up-Paddles are supplied with all necessary equipment: bag on wheels, high pressure double action pump, paddle, foot leash and repair kit.

Skiffo Elle & Lui

DROP STITCH | TRIPLE LAYER STRINGER

With the Drop Stitch, the interior of the SUP is made up of thousands of polyester threads that stretch with the pressure of the inflated board providing better resistance to compression and traction. The SUP thus gains in rigidity.

Skiffo has developed an innovative exclusive technology for its ELLE and LUI range. A double-layered stringer connects the nose to the tail, on the deck and the bottom of the board. This gains more rigidity without compromising the lightness of the SUP. The digitally printed stringer gives the Skiffo ELLE and LUI a high quality colorful finish.

A SUP THAT REVEALS ITS TRUE STRIPES FROM THE OUTSET.

A dynamic combination of blues that reminds the true masculine side of this SUP of 325 cm in length. It quickly gains in gliding speed thanks to its high rigidity. The Skiffo LUI benefits from the Drop Stitch concept that optimizes the compactness of the board under pressure. A stringer running the length of the SUP reinforces the rigidity of a triple layer. You will enjoy a SUP of exceptional buoyancy for a more than surprising gliding experience.

SunCruise Collection

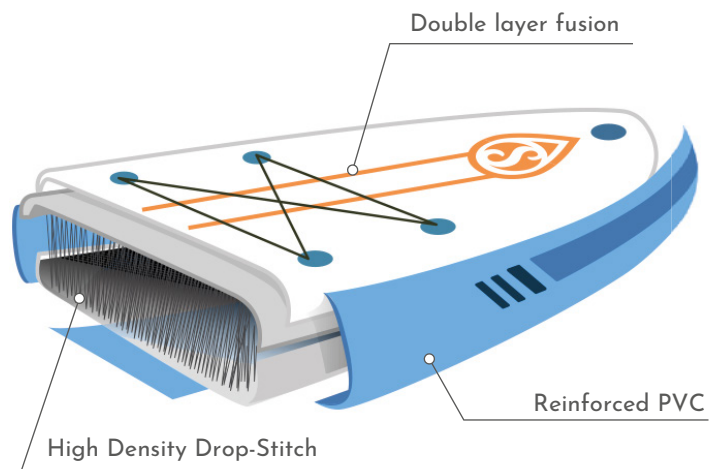

SunCruise Technology

DROP-STITCH | DOUBLE LAYER FUSION

Our Skiffo SUN CRUISE takes it up a notch and opt for cutting-edge Double Layer Fusion technology. A second layer of reinforced PVC is thermally welded to the basic Drop-Stitch construction.

This technology reinforces the Drop-Stitch design, which increases the rigidity of the board from the inside: thousands of high-density polyester fibers connect the top and bottom layers of the board to optimize the compactness and lightness of the whole board.

Inflated under high pressure (15 Psi), the SUNCRUISE SUPs guarantee exceptional rigidity and preserve the initial shape of the board in all conditions. The rail of the board is also lined with a second layer of PVC to prevent any type deformation.

WATTSUP

EXPERIENCES TO BE SHARED

The WattSup brand is designed for the public at large and offers all a beginner is requiring to start exploring the wonders of water gliding from the youngest age.

A complete range that adapts itself to small frames, female body shape, solitary riders and those who prefer to share fun time on the water with friends and family.

STURDIER THICKER BOARDS

WattSup marks the end of the 10cm thick "entry-level" boards by offering riders a selection of modern, quality and affordable Stand-Up-Paddles. These SUPs benefit however from the drop-stitch concept, which increase the board rigidity by 40% when inflated, and gain exceptional floating capacity as well as unparalleled quality of glide.

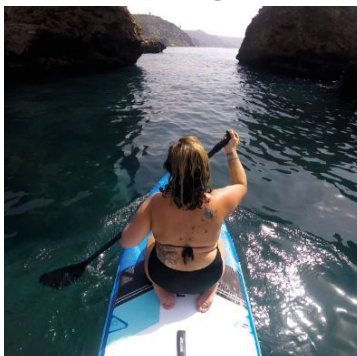

DISCREET YET DISTINCTIVE

From an aesthetics point of view, each WattSup Stand-Up-Paddle reflects its own personality, through distinctive yet discreet colours.

The Wattsup SUPs are equipped with 4 D-rings to add a kayak seat (on option) and a kick pad for easier manoeuvring. They are all supplied as a complete package with paddle, foot leash, high pressure pump, repair kit and carry bag.

WattSup makes it easy and affordable to take the plunge and explore the wonders of nature paddling!

NEW ISUP EXPERIENCES

ISup was born out of a passion for water, adventure and technologies. This range of all-round stand-up-paddles surprises by its most advanced technologies that result in boards that will accompany any adventure seeker wishing to discover the furthest lakes and shores.

From an aesthetic point of view, the ISup displays a refined modern look with a subtle play of modern teal and chartreuse yellow.

RANGE MAIN FEATURES

Studied dimensions

The ISup range comprises stand-up paddles all over 3 meters long to offer the rider exhilarating rides with a width comfortable enough to manoeuvre the board with ease. On flat waters on a lake or along sea shores, the ISups remain true to their personality wanting to always go further.

Versatility

Everything has been thought to make the ISup range an extremely versatile one. 4 d-rings to which one can attach a kayak seat (optional) as well as elastic cargo straps to bring along small equipment and a picnic. Versatility also in its capacity to be easily manoeuvred thanks to non-slip EVA foam pad strategically placed on the main part of the board and at the back as a kick pad.

Exceptional glide

All the stand-up ISup paddles claim a 15 cm thickness. Extra-rigid dropstitch technology has been applied to all four stand-up-paddles. Important features that optimizes flottability and thus gliding capacities. Take yourself on a ride knowing that your stand-up-paddle can handle your need for adventures.

All equipped

Enjoy your sport as a free spirit. Your ISup stand-up-paddle is provided with all necessary equipment: ergonomical backpack, double action pump, paddle, foot leash, and repair kit.

MAKO 10'5"

SPECS

Dimensions	318 x 81 cm / 10'5" x 32"
Thickness	15 cm / 6"
Technology	Drop-Stitch
Max. Charge	115 kg
Fins	1 central slide-in + 2 side fins

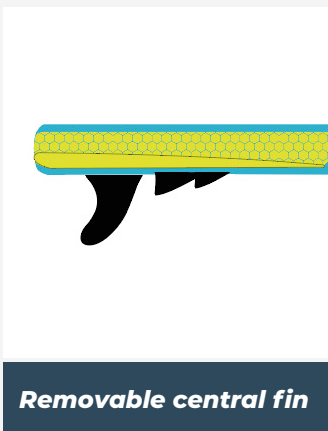

LEISURELY OUTINGS

The MAKO was designed as an all-round stand-up-paddle for long rides on calm waters on a lake or along shores. It has a length of over 3 meters and a width of 81 cm for comfortable rides that quickly pick up in speed.

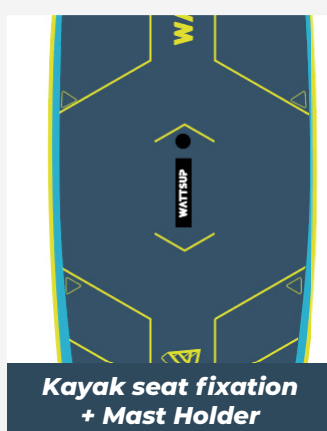

Its 15 cm thickness enhances this SUP flottability and the Dropstich technology optimizes its rigidity. Enjoy your ride standing for a good view of the horizon or seated in a kayak seat (optional) for a more leisurely outing.

All included Pack

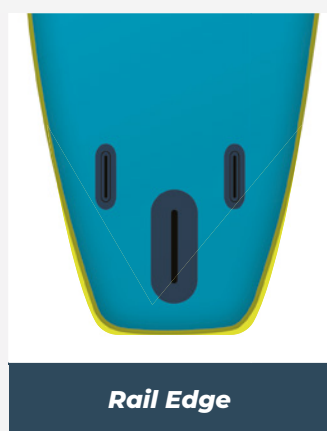

Removable central fin

The "slide in" type fin on all our boards easily slides in and out of its notch with no effect on sturdiness during the ride.

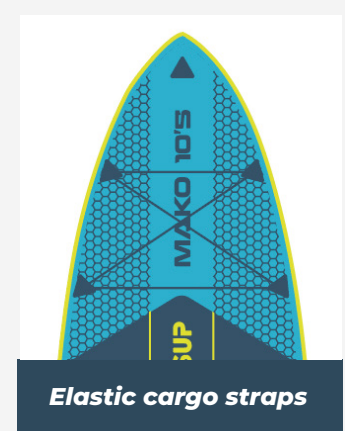

Kayak seat fixation + Mast Holder

The MAKO SUP is equipped with lateral 4 d-rings to install a kayak seat. Standing or seated, the young rider can be comfortably positioned for hours-long outings.

Rail Edge

Thanks to the rail edge, the MAKO sup benefits from a better speed, less friction for a better glide and an increased maneuverability.

Elastic cargo straps

Stand Up Paddling is a pleasant sport that offers a chance to discover amazing sceneries. Take it further and bring with you supplies that you can secure at the front of your board with the elastic cargo straps.

EXPERIENCES TO BE SHARED

Our technology
**DROP-STITCH
EXTRA-RIGID**

Thousand of polyester strands connect up the top and bottom reinforced PVC layers of the SUP. When inflated at high pressure (15 psi), they tighten up and increase the rigidity of the board; there lays the secret of Drop-Stitch technology.

At WATTSUP, we pay particular attention to the density of the yarn used in its boards. With this new Drop-Stitch confection, inflatable paddleboards are lighter and more rigid.

Wattsup SAR takes SUP one step further. Longer than its current competitors (10"/305cm), this new all-water board is a new sensation on the iSUP world thanks to its generous volumes.

Wider (32"/81cm) and thicker (6"/15cm), SAR is a versatile board, stiffer and extremely stable.

All included Pack

Removable central fin

The "slide in" type fin on all our boards easily slides in and out of its notch with no effect on sturdiness during the ride.

Kayak seat fixation

The Sar SUP is equipped with lateral 4 d-rings to install a kayak seat. Standing or seated, the young rider can be comfortably positioned for hours-long outings.

EVA pad and kick pad

In addition to their modern design, all our boards are equipped with an all-comfort EVA pad and kick pad. The raised surface at the tail of the SUP serves as a support point to easily turn in waves!

Elastic cargo straps

Stand Up Paddling is a pleasant sport that offers a chance to discover amazing sceneries. Take it further and bring with you supplies that you can secure at the front of your board with the elastic cargo straps.

ABOUT THE WINGSUP COLLECTION

With just a light breeze, discover new sensations with the Wings Up. Follow your mood of the moment, pack up your paddle in the holder provided and turn your stand-up-paddle into a wind ride.

With the Wings Up, WattSup demonstrates again its ability to remain ahead of market demand. An easy-use wing suited to any standard stand-up-paddle or foil.

Everything on the Wings Up has been thought to make rider's experience safe and easy: multiple reinforcements, ergonomic handles, and rapid inflation system.

Included in pack

Kevlar reinforcement

On all areas likely to be damaged during use, WattSup adds a number of kevlar reinforcements to practice your sport without any risk of deterioration to the equipment.

Paddle holder

The Wings Up has a paddle holder to quickly switch from a paddle practice to the Wingsup practice. This system allows you to position your hands on the long handle of the paddle while using the wing (paddle not included).

Ergonomic handles

Ergonomical and reinforced, the handles on the Wings Up have a beautiful finish. The front handle moderates the pressure on the rider's arms and diagonal handles have been added for easy technical manoeuvres.

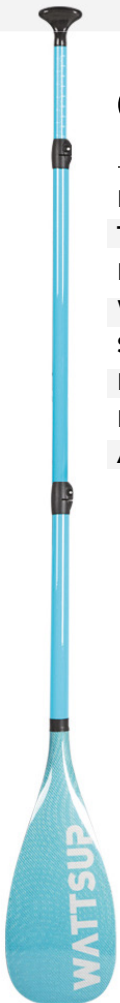

Rapid inflation system

The wing has a quick inflation system, ideal to enhance rider's experience. Another smart option ensures the wing's air pressure is distributed according to user's preferences.

ABOUT COASTO

HIGH-END INFLATABLE SUPS

The Stand-Up-paddles by Coasto are the result of countless hours of consultation with professional riders, engineers and technicians to create the perfect inflatable board for the experienced rider. The TTS (Thermo Twin Skin) is a reflection of this effort: a technology that comprises two PVC layers thermally bonded and supported by a drop-stitch concept to optimize compactness and therefore rigidity and lightness.

The manoeuvrability of the Coasto SUPs is assured by the shape of the boards and their increased nose rocker. With board lengths ranging from 7'5" to 14", Coasto is a brand that will accompany the young beginner on his/her path to professional riding and the thrill of speed gliding on waters.

SOLUTIONS AT THE FOREFRONT OF PROGRESS

Coasto is constantly evolving to remain at the forefront of progress and brings carefully studied solutions for the comfort of the rider. To meet today's market demand, every Coasto Stand-Up-Paddle is available either as a single chamber or double chamber solution.

@loliloc2c

@van_cationfiedlers

@supnbxl

@support_budapart

@beti_faktografia

@by__mich

ISUP COASTO TECHNOLOGY

Making high performance in aquatic sport accessible to all is at the heart of Coasto's mission.

Close collaborations between experts in their field - engineers, technicians, top athletes and, above all, board sports enthusiasts - have produced ingenious ideas.

A set of finely designed components for equipment and accessories that accompany riders through their wildest adventures.

DUAL CHAMBER

DOUBLE CHAMBER PUTTING RIDERS' SAFETY FIRST

Whilst most boards are made up of just one air chamber, those benefiting of the Double Chamber technology count two separate air chambers giving them exceptional capacities:

SINGLE CHAMBER

DUAL CHAMBER

RIGIDITY

Gain in rigidity by 30% : with the second integrated chamber and its side panels, the rider enjoys a ride of the same quality as with a rigid board.

SAFETY

Rider's safety: should the outside chamber encounter a leak, the separate inside chamber insures the SUP buoyancy.

STABILITY

Double Chamber stand-up-paddle gain in stability

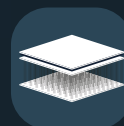

Thermo Twin Skin
glueless technology

**ROBUST AND
STABILITY**

COMFORT EVA

**DROPSTITCH
DOUBLE LAYER**

TTS THERMO TWIN SKIN

Boards built with two PVC layers are much stiffer and more durable than single layer entry-line boards. They however produce a heavier board on which some esthetical imperfections might occur. This is how **Thermo Twin Skin TTS® Technology** was born. A revolution in the stand-up-paddle market. A unique technology consisting of thermal fusion. The two layers of PVC are no longer bonded. They are now thermo-welded, meaning that heat is used instead of glue.

TTS TECHNOLOGY COMES WITH CONSIDERABLE ADVANTAGES:

LIGHTER

An important quantity of heavy glue is needed to cover the surface of a paddle board. By removing the glue, boards are 20 to 25% lighter!

HIGH END LOOK

Gluing the two layers can cause some visual imperfections, such as bubbles, pleats or blemishes, when glue is not well spread. Boards built with TTS® are smoother and have perfect finishes.

MORE DURABLE

In the long run, these same imperfections can lead to peeling. Avoiding glue offers a more qualitative board for many years.

STIFFER

Welding the two PVC layers at the early stage of the conception offers a super-stiff surface for greater floatability and rigidity.

KAYAK

CAPITOLE 1P // 2P IN DETAILS

INFLATED TO 12 PSI

Coasto opts for the high density drop-stitch technology and 2 air chambers inflated to 12 PSI so that the Capitole gets a great rigidity and reproduces the feeling of a rigid kayak without its constraints.

THE HANDLES

The reinforced fabric handles are positioned to carry the model once inflated with great ease.

CARGO STRAPS

Indispensable for long journeys, the Capitole has a cargo straps system on the front and rear to hold waterproof bags.

OPTIMIZE FOR WAVES

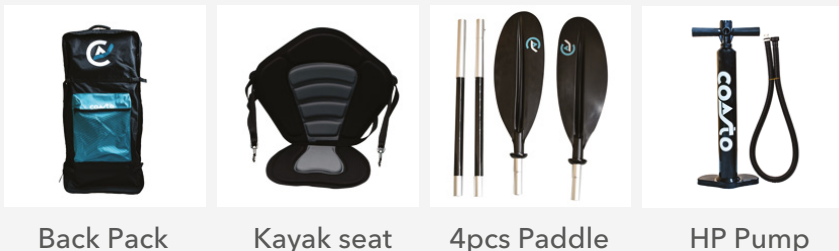

The thin and rigid bow of the kayak allows to split the waves and drastically improve the speed. This offers a better glide and reduces the effort.

PERFORMANCE AND SAFETY

To ensure that the kayaker uses the model safely, the kayak is made of reinforced PVC which gives it increased resistance to perforation.

ABOUT THE RANGE

HARMONY 10'8" / ALLURE 11' / MAJESTIC 14'

Coasto puts the spotlight on its range of rigid stand-up-paddles. A reflection of in-depth studies that have produced boards with an astonishingly gliding capacity. EPS foam enveloped in several fiberglass layers, reinforced with 2 wooden stringers. This conception affords an optimum sturdiness-lightness combination. All of Coasto's hard boards are equipped with the necessary deck vent guaranteeing the stand-up-paddle's durability over time through temperature changes.

Whether you are riding the waves or enjoying traditional stand-up-paddle outings on calm waters, you can do it with peace of mind, knowing that your Coasto equipment is made of high quality material. 4 d-rings have been placed where a kayak seat (optional) can be attached, and cargo straps are provided to secure light material during the ride.

ABOUT THE RANGE

SOFT SURF

STURDY SOFT BOARDS TO IMPROVE YOUR SURFING SKILLS

In line with its mission to remain at the forefront of market demand, Coasto introduces a range of soft top surfboards. A concept finely elaborated by its Research & Development team to produce soft surfing boards that are practical for any person wishing to discover the thrills of surfing.

The new surfer can safely work out his/her new skills on a board that provides perfect rigidity, stability, and manoeuvrability. Coasto's soft surfboards are made out of a soft foam material covering a sturdy EPS high-density foam stringer. A thruster, or third fin, equips every model for easier wave surfing.

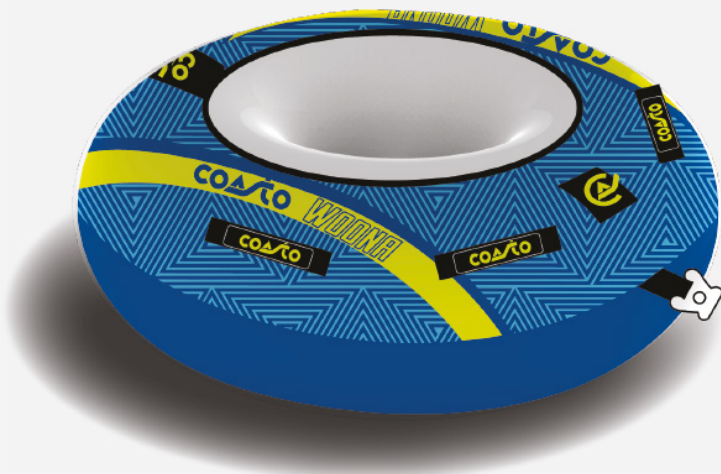

TOWABLE TUBE

ADVANCED TECHNOLOGY IN FUN WATER ACTIVITIES

The range includes 7 different models. A round shape, true reminder of the traditional tube that can accommodate 1 2 3 persons, an ergonomical shape with side wings and several strategically placed handles, and a tube shape for up to 3 people riding in a tandem.

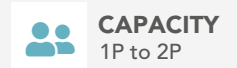

With its towable tubes range, Coasto puts its cutting-edge technologies at the service of the water leisure market.

WOOD BENCH

The seat also features an EVA foam surface for maximum comfort and aesthetics.

PVC PATCH

Two PVC patches reinforce the back of the inflatable boat where a battery, a fishing box, snorkelling accessories or any other equipment can be placed without the risk of damaging the floor.

HIGH PRESSURE FLOOR

A high pressure Dropstich technology increases the sturdiness of the floor that come close to a rigid bottom. The EVA foam covering adds comfort to the ride and creates an innovating design that is easy to clean with clear water.

REINFORCING STRIP

All Coasto inflatable boats are equipped with a reinforcing PVC strip under the tubes. With this added protection, the tender can be safely shored on a sand or pebble beach without any risk to the inflated tubes.

WOOD BENCH

COASTO dinghies are equipped with a PVC reinforcement strip under each of the tube. This protection is designed to dock on sandy or rocky beaches without damaging the flanges.

CARBON SLAT FLOOR

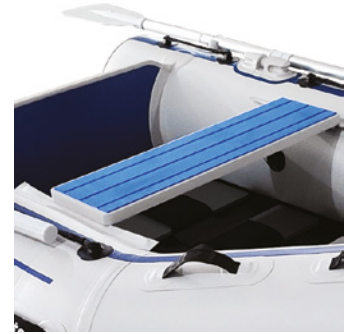

This market-exclusive design provides greater lightness and unprecedented strength, while maintaining good stability.

8 HANDLES

The dinghy is equipped with 8 solid handles, 4 of which are neoprene covered for maximum comfort and safety.

BENCH + EVA

The bench also features an EVA coating for maximum comfort and aesthetics.

INTRODUCING EMOTION INFLATABLE ELECTRIC SUP

UNVEIL THE SECRETS OF THE SHORE!

A unique concept that will appeal to all generations and all levels, from beginners to advanced. The E-MOTION is the result of Coasto's daring creations: a motorized water scooter.

With the E-MOTION, Coasto's concept of inflatable stand-up-paddle is revisited and enhanced. Dare to add a riding bar and a underwater propeller powered by an electrical rechargeable battery and the E-MOTION makes water gliding accessible to everyone. Experienced or not, enjoy all the fun of a stand-up-paddle without the tiresome paddling part.

Take on the water and unveil all the secrets the shores have kept from you until now!

EMOTION SUP

SPECS TARGETS SCOOTER

Waterproofing	IP67
Propulsion	AV/AR
Battery	Removable 12V
Speed	Up to 6 km/h
Autonomy	60 to 90min

ABOUT THE EMOTION ELECTRIC SUP

Its length of over 3 meters and width of over a meter provide this water scooter outstanding stability. The E-MOTION benefits from the same technologies as all Coasto's inflatable stand-up-paddles - dropstitch and double layer fusion - for unequal floatability. The whole surface is covered non slip EVA foam strips. 7 reinforced handles have been placed along the board and at the center for easy handling and better safety. The E-MOTION maximum load capacity can reach 400 pounds!
