

NEW FOR 2026

**POOL & WELLNESS**

 **Poolstar**  
*Pure innovation*

# BOLDNESS – PASSION – EXCELLENCE

## Dear Clients and Partners,

It is with great enthusiasm that we present our 2026 new product collection. This new edition highlights Poolstar’s vision: **a fast-growing group** that challenges market trends to reinvent pool usage, democratize the pool experience of tomorrow, and support the transformation of our industry. **For nearly twenty years**, our mission has remained unchanged — to make exceptional products accessible without ever compromising on performance or user experience.

Our approach is founded on three core values: **boldness, passion, and excellence**. Boldness fuels every innovation, passion drives our teams to design truly useful solutions, and excellence ensures the reliability you can always count on. It is this human synergy that enables us to offer equipment that is high-performance, accessible, and sustainable.

Together, let’s create the pool and wellness experience of tomorrow.  
Thank you for your continued trust,

## The Poolstar Team

« At Poolstar, we are convinced that innovation must always carry meaning and serve the user experience. »  
**Raphaël Elbaz, Founder & CEO of the Poolstar Group.**

# FRENCH ENGINEERING & INNOVATION

*In our Rousset facilities, every innovation is designed, tested, and refined with passion — shaping the products of tomorrow.”*

## R&D DEPARTMENT

Composed of engineers, product designers, and pool professionals, our Research & Development Department lies at the very heart of our product design process. Driven by a passion for the world of pools, they are the ones who bring our innovative concepts to life, with one guiding principle: to create high-performance and intuitive products.

## TESTING CENTER

On our test benches and within our real-life trial pools, we put each prototype to the test. Every year, over a hundred tests are conducted to ensure our products meet the strictest quality standards and uphold our commitment to excellence.

## TRAINING CENTER

For 2026, we are redefining our technical and sales training approach. A fully dedicated training space will open within our facilities, offering our partners and clients more comprehensive, hands-on sessions. Our team will be there to share best practices and help you master our products inside out.

# OUR CSR APPROACH

Since its creation, Poolstar has made it its mission to innovate, make its products accessible to as many people as possible, and reduce their energy impact. These three pillars guide all of the company's actions and strategic decisions.

### INNOVATION

Designing products that are ever more efficient and environmentally friendly.

### ACCESSIBILITY

Enabling as many people as possible to enjoy our innovations at increasingly competitive prices.

### COMMITMENT

Acting responsibly for a more sustainable future by creating products that consume less energy.

**Social Responsibility**  
(Improving employee well-being and fostering a positive work environment)

**Use of recyclable and recycled materials**

**Production lines powered by green energy**

**Focus on product repairability and promotion of the circular economy**

**Use of more environmentally friendly transportation methods**

**Adoption of continuous improvement tools: NPS (Net Promoter Score), Ecovadis Assessment**

## A RECOGNIZED COMMITMENT

In 2024, Poolstar earned its first Ecovadis badge, marking recognition of its commitment to Corporate Social Responsibility. In 2025, these ongoing efforts were rewarded with the Bronze Medal, reflecting our determination to continuously improve our social, environmental, and ethical practices.

# POOLEX

## ALL THE EQUIPMENT FOR A TECHNICAL ROOM

CONNECTED – AUTONOMOUS – EFFICIENT

Poolex, a specialist in next-generation technical room equipment, designs solutions that serve the pool of tomorrow. With the most comprehensive range on the market, the brand meets every need, from filtration to water treatment and temperature control. **Its expertise covers all types of pools**, from mini pools to Olympic pools, delivering uncompromising performance.

Thanks to the Poolex app and cloud platform, **the experience becomes connected**, making daily life easier for both users and professionals through automation, optimized maintenance, and continuous performance improvement. Finally, **its unique solar offering paves the way for energy-autonomous pools**. In this way, Poolex is committed to creating pools that are more sustainable, more efficient, and easier to enjoy.

# CLOUD POOLEX

THE SMART AND SUSTAINABLE POOL

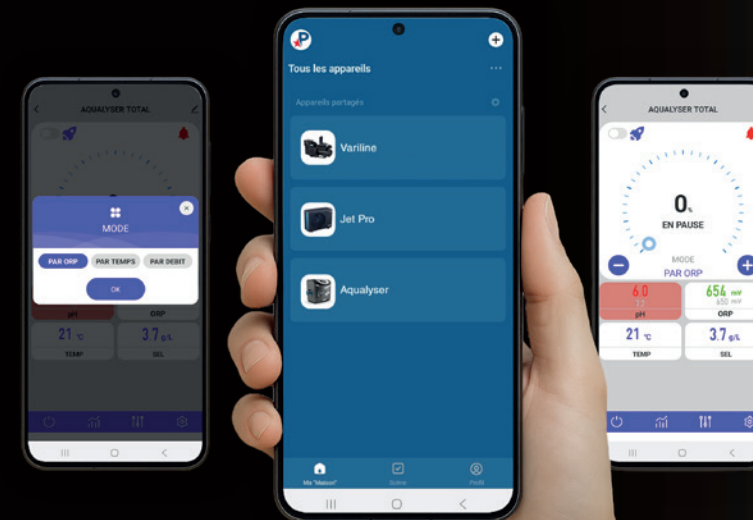

The Poolex CLOUD marks a turning point in pool management.

Powered by **artificial intelligence** and **advanced data analytics**, this platform **revolutionizes professional maintenance** by making it **more efficient and proactive**.

It offers users a simplified, automated experience, ensuring a more sustainable pool through the intelligent optimization of energy, water, and chemical consumption.

## A REIMAGINED EXPERIENCE THAT BENEFITS EVERYONE

### For the END CUSTOMER

- Centralized control of all equipment through the Poolex app.
- Simplified use, including remote access, with **full automation for effortless management**.
- **Real-time alerts** and remote professional interventions for a hassle-free pool experience.

### For the PROFESSIONAL

Designed to simplify the daily work of pool professionals, Poolex Cloud centralizes all technical data from connected devices for faster remote management and a significant reduction in on-site visits.

- **Access** via dedicated software in the Pro Area, with a complete and intuitive dashboard.
- Centralized view of all customer pools: **error history, technical data, etc.**
- Real-time **remote** diagnostics and automatic alert prioritization **to better organize interventions**.
- **Remote intervention** on devices in connection with Poolstar after-sales service.

For Poolex: continuous improvement of the user experience and products.

# AirLine 360

THE REVOLUTION FOR A  
MORE SUSTAINABLE POOL

The Airline 360 is Poolex's first heat pump to use **R290 gas**, marking a major step toward a more sustainable pool. **With a Global Warming Potential (GWP) of just 0.02, it is 99.98% less polluting than R32.**

Thanks to its **remarkable thermodynamic properties**, R290 ensures optimal heat transfer and **stable performance even at low temperatures**. Its high energy efficiency makes it an effective, **durable, and eco-friendly** refrigeration solution that meets the market's most demanding standards.

## THE COMBINATION R290 + EVI

By combining R290 with EVI (Enhanced Vapor Injection) technology, which optimizes the refrigeration cycle by reinjecting part of the gas in the form of compressed vapor, an unprecedented efficiency gain is achieved in cold conditions.

**This R290 + EVI synergy ensures stable power and unmatched performance even when outdoor temperatures drop significantly.**

PRO RANGE

# FILTRATION

## Principle reminder

The filtration pump is an essential component in the operation of a pool.

ts main role is to circulate the water through the filtration system to **remove impurities** such as leaves, debris, and suspended particles.

By pumping the water through the filter, the pump also ensures an even **distribution of treatment chemicals**, helping maintain clean and healthy water for swimming.

Compatible with  
pools up to 90m<sup>3</sup>

pH + ORP  
probes

Wifi, Cloud  
& OTA

Integrated  
lighting

2 versions :  
Total & Flex

This precise system ensures consistently **clean and healthy water** with simplified, efficient management. **Equipped with an ORP probe**, it continuously measures disinfectant effectiveness and automatically **adjusts the production of active chlorine according to the pool's actual needs**. A pH probe monitors the water's pH level and regulates the pump to maintain perfect balance.

WARRANTY **5** YEARS

**AUTOMATIC  
OR MANUAL MODES**

➔ **Automated control** : thanks to its integrated pH and ORP probes.

➔ **Compatible with pools up to 90m<sup>3</sup>** : a cell that produces up to 20 g/L depending on the pool size.

➔ **Integrated analysis chamber and Pool-Terre** : the analysis chamber enables precise readings while protecting the probes. Pool-Terre ensures reliable measurement by discharging stray currents.

➔ **Flexible installation** : thanks to its 2 versions, Total and Flex, it easily adapts to your technical room.

➔ **Automatic and manual modes** : the unit can continue to operate even when a probe needs to be replaced, ensuring greater flexibility and peace of mind with both automatic and manual modes.

## COCOON

A MOMENT FOR YOURSELF, SUSPENDED ABOVE THE CITY

Thermo-treated  
wood (Canadian pine)

LED strip  
chromotherapy

Steam  
technology

Fits small  
spaces

Compact, elegant, and high-performing, the 2-seater COCOON outdoor sauna is specially designed to fit terraces and urban spaces.

Made from thermo-treated Canadian pine, it combines natural aesthetics with exceptional weather resistance. Equipped with authentic steam technology and a chromotherapy LED strip, it

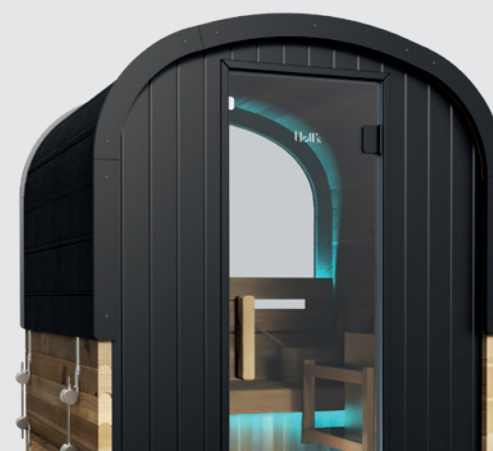

provides a soft and relaxing atmosphere, perfect for a wellness moment for two.

Thanks to its compact size, it fits perfectly into small outdoor areas without compromising on comfort or design.

A concentrated blend of relaxation, elegance, and innovation — by HOLL'S.

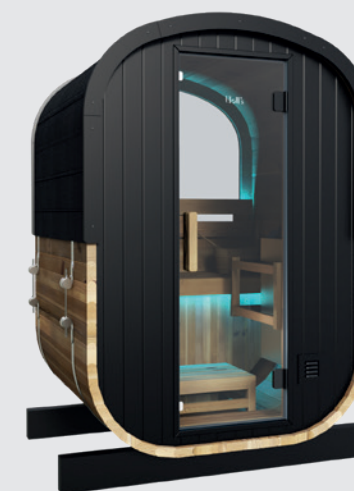

### TINTED DOOR

Providing better brightness while preserving privacy inside the cabin.

### SUITABLE FOR SMALL SPACES

130 x 130 x 200 cm

## THERMO-TREATED WOOD

Thermo-treatment is a **100% natural and eco-friendly protection** method that sustainably enhances the wood's performance.

Through a controlled heating process, pine becomes more stable, more resistant, and perfectly suited to humid environments.

Combining **ecology, aesthetics, and longevity**, the thermo-treated pine used in the HOLL'S range ensures a sauna that is as beautiful as it is durable, designed to withstand time and the elements.

# OCTAGON & DUO ICE BATHS

## NEW GENERATION COLD THERAPY

The Netspa and UFC brands have partnered to create a new generation ice bath; offering personalized recovery, robustness, and ease of use.

This cold bath is designed to meet the demands of modern athletes, whether they are fighters or any other athlete seeking to optimize their recovery.

### COMPATIBLE CHILLER & ICE CUBES

Versatile, this pool **can be cooled with ice cubes or connected to an electric chiller capable of lowering the temperature down to 2°C**, without having to transport 50 kg of ice for every bath.

Even better: **the chiller can also heat the water up to 40°C**, to transform your session into a relaxing hot bath. A double functionality ideal for varying between intense recovery and muscular relaxation, all year round.

# SPAWER

Heat pumps for spa

## THE FUTURE OF SPA HEATING STARTS HERE

MORE COMFORT, LESS ENERGY

### 4 GOOD REASONS TO CHOOSE A SPAWER

1.

#### Limit your consumption

Enjoy your spa and divide your electricity bill.

2.

#### Program your session

Manage your spa temperature remotely using the Poolex app.

3.

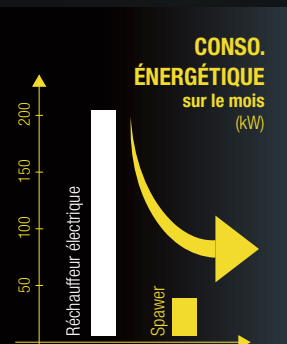

#### Always the ideal temperature

With the reversible mode, cooler water when it's hot.

4.

#### Integrated special chiller function (for the O'Spa)

The O'Spa, the most efficient heat pump in chiller mode.

## O'SPA

### THE VERSATILE HEAT PUMP FOR SPA WITH CHILLER FUNCTION

3 KW 5 KW 7 KW

Ultra-compact, the Poolex O'Spa is a heat pump for spas that allows you **to save energy on spa heating. Installable on all types of spas**, the O'Spa **can take control of the existing electric heater to optimize the spa's temperature rise.**

Its integrated **chiller function** will also allow you to **enjoy an ice bath** after, for example, an intensive sports session.

NEW EDITION

Remote control

Plug & Play connection

#### CHILLER FUNCTION

The chiller function brings versatility to this on/off pump, allowing for both hot baths and cold baths (down to 3°C) depending on your preferences.

		3 kW*	5 kW*	7 kW*
Climate (heating)		Hot	Temperate	
Air 15°C Water 38°C Humidity 70%	Max. power	2.11	3.25	4.75
	COP	2.8	3.27	3.60
Climate (cooling)		Temperate		Hot
Air 15°C Water 5°C Humidity 70%	Max. power	1.46	2.14	3.15
	EER	2.67	2.80	3.20

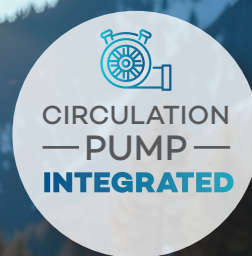

\* These powers are given in Air 26°C / Water 26°C

# O'SPA FLOW

## THE HEAT PUMP FOR SPA WITH CIRCULATION PUMP

3 kW 5 kW 7 kW

Compact and all-in-one, the Poolex O'Spa goes far beyond simple heating. **Equipped with an integrated circulation pump**, it is completely autonomous and installs without a bypass. **Compatible with all spas and Nordic baths**, it optimizes energy consumption and accelerates temperature rise

Versatile, it also includes a chiller function, transforming your spa into an ice bath for recovery and well-being.

### INTEGRATED CIRCULATION PUMP

Unlike classic solutions that require a bypass, the Poolex O'Spa integrates its own circulation pump. This ensures a constant and optimal flow rate, making the heat pump completely autonomous.

Remote control

Plug & Play connection

Integrated circulation pump

		3 kW*	5 kW*	7 kW*
Climate (heating)		Hot	Temperate	
Air 15°C Water 38°C Humidity 70%	Max.power	2.11	3.25	4.75
	COP	2.8	3	3.33
Climate (cooling)		Temperate		Hot
Air 15°C Water 5°C Humidity 70%	Max.power	1.46	2.14	3.15
	EER	2.37	2.50	3.90

These powers are given in Air 26°C / Water 26°C

# ICE SPA

## THE ULTIMATE HEAT PUMP FOR SPA

The IceSpa is a heat pump for spas, **designed to operate in extreme climates, down to 25°C**. It allows you to heat the spa while reducing energy consumption by up to 75% thanks to Full Inverter technology. Easy to install, it is compatible with all types of spas, swim spas, and Nordic baths.

		5 kW*	7 kW*
Air 15°C Water 38°C Humidity 70%	Max.power	3,87	4,7
	COP	3,64	3,7
Air -10°C Water 38°C Humidity 70%	Max.power	2,80	3,3
	COP	1,68	2,1

\*These powers are given in Air 26°C / Water 26°C

Full Inverter & E.V.I technologies

Remote control

Plug & Play connection

## E.V.I. TECHNOLOGY

ENHANCED VAPOR INJECTION

The EVI technology improves the energy efficiency of water heat pump systems by injecting additional vapor into the compressor at low ambient temperatures.

COP OF 2  
À -10°C
