

NEW FOR 2026

POOL & WELLNESS

 **Poolstar**
Pure innovation

BOLDNESS – PASSION – EXCELLENCE

Dear Clients and Partners,

It is with great enthusiasm that we present our 2026 new product collection. This new edition highlights Poolstar’s vision: **a fast-growing group** that challenges market trends to reinvent pool usage, democratize the pool experience of tomorrow, and support the transformation of our industry. **For nearly twenty years**, our mission has remained unchanged — to make exceptional products accessible without ever compromising on performance or user experience.

Our approach is founded on three core values: **boldness, passion, and excellence**. Boldness fuels every innovation, passion drives our teams to design truly useful solutions, and excellence ensures the reliability you can always count on. It is this human synergy that enables us to offer equipment that is high-performance, accessible, and sustainable.

Together, let’s create the pool and wellness experience of tomorrow.
Thank you for your continued trust,

The Poolstar Team

« At Poolstar, we are convinced that innovation must always carry meaning and serve the user experience. »
Raphaël Elbaz, Founder & CEO of the Poolstar Group.

FRENCH

ENGINEERING & INNOVATION

In our Rousset facilities, every innovation is designed, tested, and refined with passion — shaping the products of tomorrow.”

R&D DEPARTMENT

Composed of engineers, product designers, and pool professionals, our Research & Development Department lies at the very heart of our product design process. Driven by a passion for the world of pools, they are the ones who bring our innovative concepts to life, with one guiding principle: to create high-performance and intuitive products.

TESTING CENTER

On our test benches and within our real-life trial pools, we put each prototype to the test. Every year, over a hundred tests are conducted to ensure our products meet the strictest quality standards and uphold our commitment to excellence.

TRAINING CENTER

For 2026, we are redefining our technical and sales training approach. A fully dedicated training space will open within our facilities, offering our partners and clients more comprehensive, hands-on sessions. Our team will be there to share best practices and help you master our products inside out.

OUR CSR APPROACH

Since its creation, Poolstar has made it its mission to innovate, make its products accessible to as many people as possible, and reduce their energy impact. These three pillars guide all of the company's actions and strategic decisions.

INNOVATION

Designing products that are ever more efficient and environmentally friendly.

ACCESSIBILITY

Enabling as many people as possible to enjoy our innovations at increasingly competitive prices.

COMMITMENT

Acting responsibly for a more sustainable future by creating products that consume less energy.

Social Responsibility
(Improving employee well-being and fostering a positive work environment)

Use of recyclable and recycled materials

Production lines powered by green energy

Focus on product repairability and promotion of the circular economy

Use of more environmentally friendly transportation methods

Adoption of continuous improvement tools: NPS (Net Promoter Score), Ecovadis Assessment

A RECOGNIZED COMMITMENT

In 2024, Poolstar earned its first Ecovadis badge, marking recognition of its commitment to Corporate Social Responsibility. In 2025, these ongoing efforts were rewarded with the Bronze Medal, reflecting our determination to continuously improve our social, environmental, and ethical practices.

POOLEX CLOUD

FOR A SMART AND SUSTAINABLE POOL

The Poolex Cloud marks a major breakthrough in pool management.

Powered by **artificial intelligence** and **advanced data analytics**, this platform **revolutionizes professional maintenance**, making it more **efficient and proactive**.

It provides users with a simplified, fully automated experience, ensuring a more sustainable pool through the intelligent optimization of energy, water, and chemical consumption.

A REIMAGINED EXPERIENCE

FOR ALL

END USER

Centralized control of all equipment via the Poolex app. Simplified operation — even remotely — with fully automated management for a **seamless, effortless pool experience**. Real-time **alerts** and **remote professional support** ensure a trouble-free and sustainable pool.

PROFESSIONALS

Through a dedicated software interface available in the Pro Space, professionals can **monitor and diagnose all pools in one place**. A comprehensive dashboard, automatic alert prioritization, and remote diagnostics help **reduce travel and optimize maintenance efficiency**.

AFTER-SALES SERVICE

The Poolstar Customer Service team has **direct access to connected devices**. Errors are instantly identified, with full visibility of technical data and device history for real-time diagnostics. Capable of performing **remote interventions**, the team provides **proactive support** and ensures fast, **effective issue resolution**.

APOLLOHUB

THE PATH TO AN AUTONOMOUS POOL

POOL + SOLAR : A SMART COMBO

REAL BENEFITS FOR USERS AND PROS

In response to the rising cost of energy and the growing demand for sustainable solutions, **solar technology offers significant benefits for pool owners.**

Annual Savings

By taking advantage of maximum solar production precisely when your pool consumes the most energy.

Sustainable Property Value Enhancement

Through eco-friendly, visible equipment that increases the long-term value of your home.

Reduced Carbon Footprint

By choosing a clean, renewable energy source.

*For pool professionals: a unique opportunity to grow your business.
Dedicated support from Poolstar with a certification training program.*

THE REVOLUTION FOR A
MORE SUSTAINABLE POOL

The Airline 360 is the first Poolex heat pump to use **R290 gas**, marking a step forward toward a more sustainable pool **with 20% higher performance under challenging (cold) conditions**.

Combining advanced technology, innovative ventilation, and contemporary design, it meets the highest quality standards.

With its **premium powder-coated aluminum finish**, the Airline 360 blends elegant aesthetics with outstanding durability.

Reminder of the principle

The filtration pump is a key component in the operation of a swimming pool.

Its primary role is to circulate water through the filtration system to **remove impurities** such as leaves, debris, and suspended particles.

By pumping the water through the filter, the pump also ensures the even **distribution of treatment chemicals**, helping to maintain clean, healthy water for swimming.

THE FAVORITE HEAT PUMP
FOR SMALL POOLS, NOW
CONNECTED!

The favorite heat pump for small pools just got an upgrade. Even more efficient yet just as compact, it now features **smart connectivity** for remote control via the Poolex app.

Quiet, reversible (heating/cooling), with **automatic defrost** and plug & play installation, the Nano combines comfort, simplicity, and efficiency.

Its new modern design blends seamlessly into any environment, even the most compact spaces.

Available in two versions — 3 and 5 kW — **it ensures optimal heating performance from 10°C** and is compatible with all above-ground and in-ground pools.

OCTAGON & DUO ICE BATHS

NEXT-GENERATION COLD THERAPY

Netspa and UFC have joined forces to create a new-generation ice bath offering personalized recovery, durability, and ease of use.

This cold bath is designed to meet the needs of modern athletes — from fighters to any sports enthusiasts looking to optimize their recovery.

CHILLER
from 2 to 40°C

ICE CUBES

COMPATIBLE WITH **CHILLER & ICE CUBES**

Versatile, this tub **can be cooled with ice or connected to an electric chiller capable of lowering the temperature to 2°C** — no need to carry 50 kg of ice for each session.

Even better: the chiller can also **heat the water up to 40°C**, turning your session into a relaxing hot bath. A dual-function feature ideal for alternating between intense recovery and muscle relaxation all year round.
