INNOVATION 2020

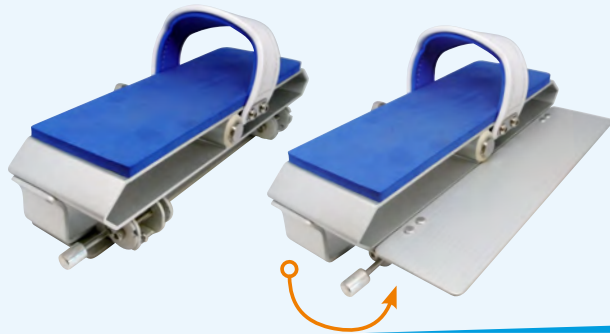

Its new structure **6063 T6 anodized aluminum** allows it to display a featherweight of 15kg, ideal for **pool entrances and exits**, while ensuring perfect rigidity. Coupled with its wide feet and silicone suction cups, the Inobike 8 AIR is easy and reassuring to use.

Its feet multiple adjustments, the saddle and the handlebars, as well as its pedals with variable resistance make them resolutely polyvalent.

MODIFY INTENSITY OF YOUR WORKOUT

Inobike 8 benefits from a **mechanical system** combining the effectiveness of a **brake** with the precision of a **gear lever**. The adjustment is done **during effort**, without even stopping pedaling, **by a simple pressure** on the gear lever, for an **ultra precise and simple dosage**. Improve your performance during your workouts. Adjust the intensity to customize your training.

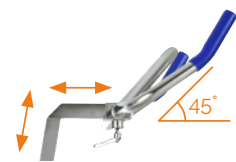

PEDALS AQUA DOUBLE SPEED

+54%
RESISTANCE

Designed with a flap under the pedal to create additional resistance. Pedal closed, you have a soft resistance for warm up, open the flap and double the intensity. Customize your workout with this unique pedal.
